	IMPORTANT CHANGES DURING THE	QUARTER/YEAR	

Give particulars (details) concerning the matters indicated below. Make the statements explicit and precise, and number them in accordance with the inquiries. Each inquiry should be answered. Enter "none," "not applicable," or "NA" where applicable. If information which answers an inquiry is given elsewhere in the report, make a reference to the schedule in which it appears.

1. Changes in and important additions to franchise rights: Describe the actual consideration given therefore and state from whom the franchise rights were acquired. If acquired without the payment of consideration, state that fact.

2. Acquisition of ownership in other companies by reorganization, merger, or consolidation with other companies: Give names of companies involved, particulars concerning the transactions, name of the Commission authorizing the transaction, and reference to Commission authorization.

3. Purchase or sale of an operating unit or system: Give a brief description of the property, and of the transactions relating thereto, and reference to Commission authorization, if any was required. Give date journal entries called for by the Uniform System of Accounts were submitted to the Commission.

4. Important leaseholds (other than leaseholds for natural gas lands) that have been acquired or given, assigned or surrendered: Give effective dates, lengths of terms, names of parties, rents, and other condition. State name of Commission authorizing lease and give reference to such authorization.

5. Important extension or reduction of transmission or distribution system: State territory added or relinquished and date operations began or ceased and give reference to Commission authorization, if any was required. State also the approximate number of customers added or lost and approximate annual revenues of each class of service. Each natural gas company must also state major new continuing sources of gas made available to it from purchases, development, purchase contract or otherwise, giving location and approximate total gas volumes available, period of contracts, and other parties to any such arrangements, etc.

6. Obligations incurred as a result of issuance of securities or assumption of liabilities or guarantees including issuance of short-term debt and commercial paper having a maturity of one year or less. Give reference to FERC or State Commission authorization, as appropriate, and the amount of obligation or guarantee.

7. Changes in articles of incorporation or amendments to charter: Explain the nature and purpose of such changes or amendments.

8. State the estimated annual effect and nature of any important wage scale changes during the year.

9. State briefly the status of any materially important legal proceedings pending at the end of the year, and the results of any such proceedings culminated during the year.

Describe briefly any materially important transactions of the respondent not disclosed elsewhere in this report in which an officer, director, security holder reported on Page 104 or 105 of the Annual Report Form No. 1, voting trustee, associated company or known associate of any of these persons was a party or in which any such person had a material interest.
 (Reserved.)

12. If the important changes during the year relating to the respondent company appearing in the annual report to stockholders are applicable in every respect and furnish the data required by Instructions 1 to 11 above, such notes may be included on this page.
 13. Describe fully any changes in officers, directors, major security holders and voting powers of the respondent that may have occurred during the reporting period.

14. In the event that the respondent participates in a cash management program(s) and its proprietary capital ratio is less than 30 percent please describe the significant events or transactions causing the proprietary capital ratio to be less than 30 percent, and the extent to which the respondent has amounts loaned or money advanced to its parent, subsidiary, or affiliated companies through a cash management program(s). Additionally, please describe plans, if any to regain at least a 30 percent proprietary ratio.

IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)							

- 1. No changes to or purchases of franchise rights occurred.
- 2. There were no acquisitions of ownership in other companies by reorganization, merger, or consolidation with other companies.
- 3. There were no purchases or sales of operating units or systems.
- 4. No important leaseholds were entered into or surrendered.
- 5. There were no important expansions or reductions to the transmission or distribution system.
- 6. No new obligations were incurred as a result of issuance of securities or assumption of liabilities or guarantees including the issuance of short-term debt and commercial paper have a maturity of one year of less.
- 7. There were no changes in articles of incorporation or amendments to charter.
- 8. No significant changes to the wage scale occurred.
- 9. See page 123 Notes to Financial Statements for discussion of legal proceedings.
- 10. None
- 11. Reserved
- GMP experienced a major storm in January 2021. The incremental major storm cost, net of a \$1.2M deductible, was \$1M. Pursuant to GMP's MYRP, this cost was offset against Q2FY2021 Power Supply and Revenue Adjustor over-collections.

On March 2, 2021, GMP executed a Purchase Power Agreement (PPA) with Great River Hydro under which GMP will purchase clean, cost-effective, local and reliable power for its customers. The PPA is for 30 years starting in 2023 and is subject to Vermont Public Utility Commission (PUC) approval.

On March 17, 2021, GLOBALFOUNDRIES (GF) filed a petition with the PUC to become a Self-Managed Utility (SMU) at its Essex, Vermont manufacturing site starting in 2023. If approved by the PUC, GF would directly manage its own transmission connections, distribution system, and power supply costs. GF is GMP's largest retail electric customer and GMP's only Transmission Class Customer.

Also on March 17, 2021, GMP entered into an agreement with GF related to GF's petition to become an SMU. Key terms and conditions of this agreement are:

- GMP will support GF's SMU Petition.
- GMP and GF will enter into a Transitional Purchase Power Agreement under which GMP will continue to provide GF with its full energy and capacity requirements for a three-year period commencing October 1, 2023.
- GF will make a series of transition payment to GMP from 10/1/22 to 9/30/26 which will total \$15.6M.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
	(1) <u>X</u> An Original	(Mo, Da, Yr)					
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1				
IMPORTA	IMPORTANT CHANGES DURING THE QUARTER/YEAR (Continued)						

This agreement smooths the transition of GF to an SMU and ensures an acceptable level of cost stability and predictability for GMP's remaining customers.

At the same time GF filed its petition, GMP filed a petition to modify its service territory to facilitate the transaction, subject to PUC approval.

13. Mary Chronopoulos – Director – resigned effective February 24, 2021.

Brian Otley, Senior Vice President and Chief Operating Officer resigned his position effective March 19, 2021.

Not Applicable.

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report
Green Mountain Power Corp	 (1) X An Original (2) A Resubmission 	(Mo, Da, Yr) 03/31/2021	End of2021/Q1
Quarterly			

1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.

2. Enter in column (e) the balance for the reporting guarter and in column (f) the balance for the same three month period for the prior year.

3. Report in column (g) the guarter to date amounts for electric utility function; in column (i) the guarter to date amounts for gas utility, and in column (k) the quarter to date amounts for other utility function for the current year quarter.

4. Report in column (h) the quarter to date amounts for electric utility function; in column (j) the quarter to date amounts for gas utility, and in column (l) the quarter to date amounts for other utility function for the prior year quarter.

5. If additional columns are needed, place them in a footnote.

Annual or Quarterly if applicable

5. Do not report fourth quarter data in columns (e) and (f)

6. Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility columnin a similar manner to a utility department. Spread the amount(s) over lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals. 7. Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

	STATEMENT OF INCOME FOR THE YEAR (Continued)		

9. Use page 122 for important notes regarding the statement of income for any account thereof.

10. Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases.

11 Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purches, and a summary of the adjustments made to balance sheet, income, and expense accounts.

12. If any notes appearing in the report to stokholders are applicable to the Statement of Income, such notes may be included at page 122.

13. Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.
 14. Explain in a footnote if the previous year's/quarter's figures are different from that reported in prior reports.

15. If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

NOTES TO FINANCIAL STATEMENTS						
1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained						
Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement,						

providing a subheading for each statement except where a note is applicable to more than one statement.

2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.

3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.

4. Where Accounts 189, Unamortized Loss on Reacquired Debt, and 257, Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.

6. If the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.

7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.

8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recent year have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist, the disclosure of such matters shall be provided even though a significant change since year end may not have occurred.

9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

PAGE 122 INTENTIONALLY LEFT BLANK SEE PAGE 123 FOR REQUIRED INFORMATION.

Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1			
NOTES TO FINANCIAL STATEMENTS (Continued)						

The notes below are excerpts from the Company's GAAP basis consolidated financial statements as of and for the years ended September 30, 2020 and 2019. The following disclosures contain information in accordance with GAAP reporting requirements. As such, due to differences between FERC and GAAP reporting requirements, certain disclosures may not agree to balances in the FERC financial statements. In particular, the activity related to Vermont Yankee Nuclear Power Corporation may be presented in the GAAP notes, but has been eliminated in accordance with FERC reporting instructions.

(1) Nature of Operations

Green Mountain Power Corporation (GMP or the Company), a wholly owned subsidiary of Northern New England Energy Corporation (NNEEC), operates as an electric utility that purchases, generates, transmits, distributes, and sells electricity, and utility construction services in Vermont. On June 27, 2012, NNEEC acquired Central Vermont Public Service Corporation (CVPS). CVPS was then merged with and into GMP effective October 1, 2012. GMP is regulated by the Vermont Public Utility Commission (VPUC) and utilizes the Uniform System of Accounts established by the Federal Energy Regulatory Commission (FERC).

GMP's wholly owned subsidiaries include Vermont Yankee Nuclear Power Corporation (VYNPC), which was formed on August 4, 1966 to construct and operate a nuclear-powered electric generating plant (the Plant). The Plant was shut down on December 29, 2014. VYNPC is subject to regulation by the FERC and the VPUC with respect to rates, accounting and other matters.

COVID-19 pandemic

In March 2020, the World Health Organization declared a global pandemic due to the outbreak of coronavirus (COVID-19). The pandemic is evolving quickly and has affected businesses, financial markets, public policies, and citizens the world over. Emergency measures enacted by governments, including social distancing, travel restrictions, voluntary isolation, and other measures, are creating major challenges affecting the economy for which the magnitude, impact, and duration are unknown.

The propagation of COVID-19 may extend into the future and affect, either directly or indirectly, the Company's operations as well as its suppliers and customers. A new wave of contagion could require governments to reexamine the re-opening protocols and impose tighter restrictions, reducing economic activity.

GMP provides essential services during this emergency and communicates regularly with federal and state authorities and industry resources to ensure a coordinated response. The Company regularly communicates with its customers regarding the tools and resources available and to help its customers stay informed during this public health crisis.

COVID-19 did not have a significant impact on the financial statements as of September, 30, 2020. The Company is continually monitoring the evolution of the situation and contributing to the collective effort to fight the spread of COVID-19.

(2) Summary of Significant Accounting Policies

(a) Principles of Consolidation and Presentation

The accompanying consolidated financial statements of GMP include the accounts of wholly owned subsidiaries as well as those of variable interest entities (VIEs) for which GMP is the primary beneficiary. A primary beneficiary has the power to direct or control the activities that most significantly influence the performance of an entity and has the obligation to absorb the entity's losses or receive its benefits. Noncontrolling interests

NOTES TO FINANCIAL STATEMENTS (Continued)				

represent the proportionate equity interest of owners in GMP's consolidated entities that are not wholly owned. See note 22. All significant intercompany transactions with consolidated affiliates have been eliminated upon consolidation.

The Company uses the hypothetical liquidation at book value (HLBV) method to account for its economic interests held in partnership with a tax equity partner (see note 22). The HLBV method is being used because the agreement between the partners states that liquidation rights and distribution priorities do not correspond to the percentage ownership interests. For these business interests, using ownership percentage to allocate the investee's net income to the partners fails to reflect the economic benefits that each partner will receive outside the structure. The HLBV method is a balance sheet method that considers the amount that each partner would receive or pay if the partnership liquidated all assets and settled all liabilities at book value and distributed the liquidation proceeds to the partners based on the priorities set out in the agreement. This method also takes into account the tax considerations created for each partner.

The Company accounts for its investments in joint ventures and entities subject to significant influence using the equity method of accounting (see note 4). The equity method is an accounting method whereby the investment is initially recognized at cost, and the carrying amount is thereafter adjusted by recording the share in the earnings and the share in the transactions affecting the equity of the joint venture or entity subject to significant influence. With respect to distributions received from equity-accounted interests, a distribution-by-nature approach is used for the consolidated statement of cash flows presentation. According to this approach, distributions generated by operating activities are reported in operating activities, whereas return-of-capital distributions are reported in investing activities. When there is a credit balance for an interest in a joint venture or an entity subject to significant influence, the investment is reported in other noncurrent liabilities. The Company's share of the net earnings or losses of these companies is included in equity in earnings of associated companies in the consolidated statements of income.

The proportionate shares of ownership in jointly controlled assets are accounted for proportionally according to ownership interest. Proportionate shares in assets are included on the consolidated balance sheets and proportionate shares in expenses are included in the consolidated statement of income. The Company is responsible for its proportionate share of the financing.

In preparing the consolidated financial statements in conformity with generally accepted accounting principles (GAAP), management must make estimates and assumptions that have an impact on the consolidated balance sheet asset and liability amounts, on the contingent liabilities reported on the date of the consolidated financial statements, and on the amounts of the consolidated income statement items for the fiscal year (FY). Actual results may differ from these estimates. Significant items subject to such estimates and assumptions include the actuarial and economic assumptions used to account for employee pension plans and other postretirement benefits (employee future benefits), the allowance for uncollectible accounts receivable; unbilled revenue balances, impacts of regulatory decisions and other proceedings on regulatory assets and liabilities and on property, plant and equipment, the future cost of retiring property, plant and equipment, income taxes, the fair value of derivative financial instruments, lease liabilities and Right-of-Use Assets (ROU), environmental reserves and the determination of provisions such as legal contingencies.

GMP's total comprehensive income is equal to net income for the years ended September 30, 2020 and 2019.

(b) Regulatory Accounting

The Company's utility operations, including accounting records, rates, operations, and certain other practices, are subject to the regulatory authority of the FERC and the VPUC.

The Company accounts for certain transactions in accordance with permitted regulatory accounting principles.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

Regulators may permit specific incurred costs, typically treated as expenses by unregulated entities, to be deferred and expensed in future periods when it is probable that such costs will be recovered in customer rates. Incurred costs are deferred as regulatory assets when the Company concludes it is probable that future revenues will be provided to permit recovery of the previously incurred cost. The Company analyzes evidence supporting deferral, including provisions for recovery in regulatory orders, past regulatory precedent, other regulatory correspondence, and legal representations. A regulatory liability is recorded when amounts that have been recorded by the Company are likely to be refunded to customers through the rate-setting process. Regulatory assets and liabilities also include the fair value adjustments related to derivative financial instruments that cannot be considered as income or expense for rate-making purposes until the derivative financial instrument is settled.

(c) Cash and Cash Equivalents

GMP considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents.

(d) Revenue Recognition, Accounts Receivable, and Deferred Regulatory Revenue

Revenues from rate-regulated activities come mainly from electricity distribution activities. Most of the Company's contracts have only one performance obligation, namely the delivery of energy. More specifically, energy distribution revenues are recorded as the energy is delivered and according to the amount that the Company is permitted to bill customers in accordance with the underlying price agreements approved by the VPUC. The unbilled revenues, which totaled \$22,730 and \$24,130 at September 30, 2020 and 2019, respectively, are included in trade accounts receivable in the consolidated balance sheets.

Wholesale revenues represent sales of electricity to other utilities, typically for resale, and to ISO New England for amounts by which GMP's power supply resources exceed customer loads.

Revenues in excess of allowed costs or earnings in excess of earnings allowed under applicable rate plans or regulatory orders are deferred, if and when applicable.

Sales taxes collected from commercial customers are accounted for as a liability until remitted to the government and are excluded from operating revenues in the consolidated statements of income.

GMP estimates the amount of accounts receivable that will not be collected and records an allowance for estimated uncollectible amounts based upon historical experience. Charge-offs against the allowance are considered after reviewing the facts of each individual account.

(e) Inventories

GMP's inventory of generation fuel is accounted for on a first in, first out basis. Materials and supplies are recorded at cost and determined on a weighted average basis. GMP accounts for purchased Renewable Energy Certificates (RECs) using the inventory method. RECs are recorded to inventory at their acquisition cost. When RECs are sold or retired the RECs are removed from inventory at cost. GMP's self-generated RECs have an inventory carrying cost of zero. GMP's inventories consist of the following:

	 September 30	
	 2020	2019
Fuel	\$ 4,589	4,461
Materials and supplies	23,266	19,343

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

RECs	12,051	10,385
Total inventory	\$ 39,906	34,189

GMP generates and purchases RECs in the normal course of business, and sells these RECs in order to reduce net power costs for GMP's retail customers and retires RECs to meet regulatory mandates (see note 17(i)). REC revenue and costs are reflected in retail rates.

During the years ended September 30, 2020 and 2019, net REC revenue was \$12,189 and \$18,506, respectively.

(f) Utility Plant in Service and Long Lived Assets

Utility plant in service is stated at cost. Major expenditures for plant additions are recorded at original cost and include all construction-related direct labor and materials, as well as indirect construction costs. The costs of replacements and improvements of significant property units are capitalized. The costs of maintenance, repairs, and replacements of minor property units are charged to maintenance expense. The costs of units of property removed from service net of salvage value, are charged to accumulated depreciation.

Depreciation expense is recognized on a straight-line basis based on depreciation rates adopted as a result of depreciation studies approved by the VPUC. The Company amortizes its intangible and regulatory assets using the straight-line method based on the cost and amortization period approved by the VPUC.

(g) Long Term Investments

Investment securities included in the VYNPC Spent Fuel Disposal Trust, the VYNPC Rabbi Trust and the Millstone Decommissioning Trust consist primarily of debt and equity securities and are reflected on the consolidated balance sheets at their aggregate fair values.

A decline in the market value of any available for sale security below amortized cost basis that is deemed to be other-than-temporary (OTTI) results in an impairment to reduce the carrying amount to fair value. To determine whether an impairment of a security is OTTI, GMP considers whether evidence indicating the amortized cost of the investment is recoverable outweighs evidence to the contrary.

When a security impairment is considered an OTTI, the amount of OTTI recognized in earnings depends on if the Company intends to sell the security, it is more likely than not the Company will be required to sell the security before recovery of its amortized cost basis or the Company does not expect to recover the entire amortized cost basis. If the Company intends to sell the security or will be required to sell the security before recovery of its amortized cost, the OTTI recognized in earnings is equal to the entire difference between the security's amortized cost and its fair value at the balance sheet date. If the Company does not intend to sell the security and it is not more likely than not that the Company will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the OTTI is separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is recognized in earnings and the portion of the loss related to other factors is recognized in other comprehensive income (OCI). The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected using the Company's cash flow projections using its base assumptions.

For the years ended September 30, 2020 and 2019, there were no permanent impairments or credit losses.

Millstone Decommissioning Trust: All dividend and interest income and realized and unrealized gains and losses

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)	-	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

are recorded to a regulatory liability since the fair value of the Millstone Decommissioning Trust Fund exceeds the related asset retirement obligation.

VYNPC Spent Fuel Disposal and Rabbi Trust Funds: Realized gains and losses on the sale of securities are recognized at the time of sale and dividend and interest income are recognized when earned. For the VYNPC Spent Fuel Disposal Trust whose investments were primarily debt securities, unrealized gains (losses) on investments, generally recorded in accumulated other comprehensive income in stockholder's equity under GAAP, were recorded as regulatory assets or liabilities in GMP's balance sheets because GMP is a cost-of-service rate regulated entity and such amounts have been recoverable or creditable in rates when realized, through its contracts with Sponsors. The Spent Fuel Disposal Trust was dissolved on June 26, 2020, see note 5(a) for further details.

For the VYNPC Rabbi Trust whose investments are primarily equity securities, unrealized gains and losses are recorded to the income statement. These unrealized gains and losses are returned to/collected from Sponsors through VYNPC's FERC tariff.

(h) Leases

A lease is an arrangement that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The Company determines if an arrangement is a lease at inception of the contract. The Company classifies a lease as a finance lease if it meets any one of specified criteria that in essence transfers ownership of the underlying asset to the Company by the end of the lease term. If a lease does not meet any of those criteria, the Company classifies it as an operating lease. On the Consolidated balance sheet, operating leases are recognized as ROU assets and included in operating lease right-of-use assets whereas corresponding liabilities are included in current portion of operating lease liabilities and noncurrent portion of operating lease liabilities.

Lease liabilities and ROU assets require the use of judgment and estimates, which are applied in determining the term of a lease, appropriate discount rates, whether an arrangement contains a lease, whether there are any indicators of impairment for ROU assets and whether any ROU assets should be grouped with Other long-lived assets for impairment testing.

Operating lease ROU assets and operating lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date of the lease agreement. As the Company's lease contracts do not provide an implicit interest rate, the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of future payments.

The operating lease ROU asset also includes any lease payments made at or before commencement date and initial direct costs incurred and excludes lease incentives. Lease terms may include options to extend or terminate the lease when it is reasonably certain that the Company will exercise that option. Operating lease expense is recognized on a straight-line basis over the lease term and included in Selling, administrative and marketing expense in the consolidated statements of income.

(i) Impairment of Long Lived Assets

GMP performs an evaluation of long-lived assets, including utility plant and regulatory assets subject to amortization, for potential impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the carrying value of the long-lived asset is not recoverable based

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

on undiscounted cash flows expected to be generated by the asset, an impairment charge is recognized to the extent that the carrying value exceeds its fair value.

Regulatory assets are charged to expense in the period in which they are no longer probable of future recovery. In addition, if the Company concludes that certain costs of property, plant and equipment and of intangible assets related to rate-regulated activities are no longer likely to be recovered or returned through future rate adjustments, the carrying amounts of these assets would be adjusted accordingly.

There were no impairment of long-lived assets for the years ended September 30, 2020 and 2019.

(j) Environmental Liabilities

GMP is subject to federal, state, and local regulations addressing air and water quality, hazardous and solid waste management and other environmental matters. Only those site investigation, characterization, and remediation costs currently known and determinable can be considered "probable and reasonably estimable." As costs become probable and reasonably estimable, environmental liability reserves are adjusted as appropriate. As reserves are recorded, regulatory assets are recorded to the extent environmental expenditures will be recovered in rates. Estimates are based on studies performed by third parties.

(k) Derivative Financial Instruments

There are three different ways to account for derivative instruments: (i) as an accrual agreement, if the criteria for the normal purchase normal sale exception are met and documented; (ii) as a cash flow or fair value hedge, if the specified criteria are met and documented, or (iii) as a mark to market agreement with changes in fair value recognized in current period earnings. All derivative instruments that do not qualify for the normal purchase normal sale exception are recorded at fair value in derivative financial instrument assets and liabilities on the consolidated balance sheets.

Gains or losses resulting from changes in the values of those derivatives are accounted for pursuant to a regulatory accounting order issued by the VPUC as discussed below. The Company uses derivative instruments primarily to hedge the cash flow effects of price fluctuations in its power supply costs. The Company is exposed to credit loss in the event of nonperformance by the other parties to the hedge agreements. The credit risk related to the hedge agreements is limited to the cost to the Company to replace the aforementioned hedge arrangements with like instruments. The Company anticipates that the counterparties will be able to fully satisfy their obligations under the hedge agreements. The Company monitors the credit standing of the counterparties.

On April 11, 2001, the VPUC issued an accounting order that requires GMP to defer recognition of any earnings or other comprehensive income effects relating to future periods caused by changes in the fair value of power supply arrangements that qualify as derivatives. Any changes in the fair value of the derivative financial instrument are recorded as a regulatory asset or liability, as appropriate. As these derivative contracts are settled, GMP records power supply costs or wholesale revenues, as appropriate. There is no realized gain and loss impact to earnings since all power supply costs and wholesale revenues are included in the Power Supply Adjustor (PSA).

(I) Taxes Other than Income Taxes

Taxes other than income consist primarily of various property taxes, Vermont gross receipts taxes and certain employer payroll tax expenses. The Company recognizes the taxes in the period incurred.

(m) Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates for regulated business is recorded in a regulatory asset or liability and recognized in income in periods when the regulatory asset or liability is amortized or otherwise reversed. The effect on deferred tax assets and liabilities of a change in tax rates for non-regulated business is recognized in income or expense in the period that includes the enactment date.

Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Investment tax credits (ITCs) are recorded as a liability and amortized as a tax expense benefit over the lives of the relevant assets.

The Company recognizes the effect of uncertain income tax positions only if those positions are more likely than not to be sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest expense related to unrecognized tax benefits in interest expense and penalties in other income, net in the consolidated statements of income.

(n) Pension and Other Postretirement Benefit Plans

GMP has defined benefit pension plans covering certain of its employees. The benefits are based on years of service and the employee's compensation during the five years before retirement. GMP also sponsors defined benefit postretirement health care and life insurance plans for retired employees and their dependents. Effective January 1, 2008, for GMP employees and April 1, 2010 for former CVPS employees, newly hired employees are not eligible to participate in GMP's defined benefit pension plans, but instead qualify for an enhanced 401(k) benefit.

The Company records annual amounts relating to its pension and postretirement plans based on calculations that incorporate various actuarial and other assumptions, including discount rates, mortality, assumed rates of return, compensation increases, turnover rates, and healthcare cost trend rates. The Company reviews its assumptions based on current rates and trends annually. The effect of modifications to those assumptions is recorded in regulatory assets and amortized to net periodic cost over future periods using the corridor method. The Company believes that the assumptions utilized in recording its obligations under its plans are reasonable based on its experience and market conditions.

The net periodic costs are recognized as employees render the services necessary to earn the postretirement benefits. The Company's methodology for estimating the service cost and interest cost components of their pension and postretirement plans involves applying specific spot rates along the yield curve to the projected cash flows in order to estimate the service cost and interest cost for each plan. Unamortized amounts that are expected to be recovered from or returned to ratepayers in future years are recorded as a regulatory asset or regulatory liability, respectively. See notes 3 and 14.

(o) Fair Value Measurements

The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. The Company determines fair value based on assumptions that market participants would use in pricing an asset or liability in the principal or most advantageous market. When considering market participant assumptions in fair value measurements, the following fair value hierarchy distinguishes between observable and unobservable inputs, which are categorized in one of the following levels:

1 Level 1 Inputs: Unadjusted quoted prices in active markets for identical assets or liabilities accessible to the

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

reporting entity at measurement date.

- 2 Level 2 Inputs: Other than quoted prices included in Level 1 inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.
- 3 Level 3 Inputs: Unobservable inputs for the asset or liability used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

The level in the fair value hierarchy within which a fair value measurement in its entirety falls is based on the lowest level input that is available for that particular financial instrument. The values of publicly traded fixed income and equity securities are based on quoted market prices and exchange rates. Nonmarketable securities, which include alternative investments in hedge, private equity, and other similar funds, are valued using current estimates of fair value in the absence of readily determinable market values. The fair values are determined by management utilizing information provided by the investment manager and are based on appraisals or other estimates that require varying degrees of judgment. Management also takes into consideration, among other things, the cost of the securities, prices of recent significant placements of securities of the same issuer, and subsequent developments concerning the companies to which the securities relate.

Fixed income securities, including U.S. Treasury/agency obligations, municipal obligations, and corporate bonds, are valued at the closing price reported on the active market on which the individual securities are traded. Other securities are valued by utilizing quoted market prices, dealer quotations, alternative pricing sources supported by observable inputs, or by industry standard models that consider various assumptions including yield curves, volatility factors, prepayment speeds, and default rates.

The Company's accounting policy is to recognize transfers between levels of the fair value hierarchy on the date of the event or change in circumstances that caused the transfer.

The estimated fair value of alternative investments represents the ownership interest in the net asset value (NAV) of the respective partnership. All investments for which NAV is used to measure fair value are not required to be categorized within the fair value hierarchy.

The Company's financial instruments consist primarily of cash and cash equivalents, accounts receivable, prepaid expenses and other current assets, income taxes receivable (payable), accounts payable, accrued liabilities, short term debt, long term debt, the spent fuel disposal fee and accrued interest obligation, the Millstone Decommissioning, Spent Fuel and Rabbi Trust Funds, and pension assets.

(p) Contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

(q) Recently Adopted Standards

Leases

In February 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (ASC) Topic 842, Leases, with subsequent amendments issued in 2018. The new lease guidance affects all companies and organizations that lease assets, and requires them to record on their balance sheet ROU assets and lease liabilities for the rights and obligations created by those leases. Under ASC 842, a lease is an arrangement that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The new guidance retains a distinction between finance leases and operating leases, while

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

requiring companies to recognize both types of leases on their balance sheet. The classification criteria for distinguishing between finance leases and operating leases are substantially similar to the criteria for distinguishing between capital leases and operating leases in legacy U.S. GAAP - ASC 840. Lessor accounting remains substantially the same as ASC 840, but with some targeted improvements to align lessor accounting with the lessee accounting model and with the revised revenue recognition guidance under ASC 606. The new standard and amendments require new qualitative and quantitative disclosures for both lessees and lessors.

On October 1, 2019, the Company adopted ASU 842 using the modified retrospective approach as of the effective date of the new standard. Comparative information has not been restated and continues to be reported under the previous lease guidance ASC 840. The transition practical expedient that allows companies to not separate lease and non-lease components has also been elected for lessee arrangements.

The Company elected to apply the following practical expedients:

- 1 to not assess existing or expired land easements that were not previously accounted for as leases under current standards before October 1, 2019.
- 2 to not reassess any contract, existing or expired on the adoption date, to determine if the contract is a lease in accordance with the new standard.
- 1 to not reassess the classification (operating or finance) of leases existing on the adoption date.
- 2 to not reassess whether the previously capitalized initial direct costs continue to satisfy the definition in accordance with ASC 842.

On adoption of ASC 842, operating leases were recognized on the balance sheet. On October 1, 2019, the adoption resulted in the recognition of an operating lease right-of-use asset of \$10,673 and an increase to current and noncurrent portion of operating lease liabilities of \$348 and \$9,956, respectively.

The adoption of ASC 842 did not impact lessor accounting, the consolidated statement of income, or the consolidated statement of cash flows.

In comparison to operating lease obligations disclosed as of September 30, 2019, the land leases classified as operating leases under ASC 840 is consistent with those identified in the transition adjustment to ASC 842. Refer to note 7 for more details.

(3) Rate Regulation and Regulatory Assets and Liabilities

(a) Rate Regulation

As a condition of the VPUC's approval of the CVPS acquisition, the Company agreed to a plan for sharing merger synergies with customers, and is obligated to provide customers at least \$144,000 (nominal dollars) in savings over the ten-year period 2013-2022. The Company has not recognized an obligation in its consolidated financial statements since it expects that the total measured savings to customers will be achieved.

On May 24, 2018, the VPUC approved the continuation of the PSA and Exogenous Change Adjustments for the Company through the approval of a successor regulation plan or until December 31, 2019, whichever occurred first.

Name of Respondent	This Report is:	Date of Report	Year/Period of Report	
	(1) <u>X</u> An Original	(Mo, Da, Yr)		
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1	
NOTES TO FINANCIAL STATEMENTS (Continued)				

On June 4, 2018, the Company filed a proposed Multi-Year Regulation Plan (MYRP) to establish the process to set the Company's rates for the three-year period FY 2020 - 2022 (October 1, 2019 through September 30, 2022). On May 24, 2019, the VPUC approved the MYRP.

The MYRP includes a projected, smoothed base rate for the three years of the plan based on a forecast of all costs. The MYRP allows for annual base rate adjustments for power supply costs, retail revenue forecasts, return on equity and associated ancillary impacts on taxes. The non-power costs will be fixed for the term of the plan, based on the initial three year forecast, and GMP's capital expenditure is limited over the life of the MYRP, unless specific exceptions are approved. The allowed return on equity adjusts annually, up or down, based on 50% of the change in the 10-year treasury bond yield over a defined measurement period. In addition, the MYRP includes Power Supply and Retail Revenue adjustors, major-storm and non-storm Exogenous Change adjustors, and an Emerald Ash Borer (EAB) adjustor. The MYRP also allows for an Earnings Sharing Adjustment Mechanism (ESAM) and authorizes the Company to seek approval of a Climate Plan to address threats to GMP's system from more frequent and intense storm events.

The MYRP requires GMP to file a traditional cost of service rate case no later than January 15, 2022, for rates for FY 2023.

On June 13, 2019, the Company filed its initial annual base rate filing pursuant to the MYRP for rates effective October 1, 2019. On September 26, 2019, the VPUC approved a 2.72% base rate increase with an allowed ROE of 9.06% to go into effect October 1, 2019.

On June 1, 2020, the Company filed the second of three annual filings pursuant to the MYRP for rates effective October 1, 2020. The refreshed FY 2021 base rate filing resulted in a (0.06%) rate decrease with an allowed ROE of 8.20%. The change in the allowed ROE is based on 50% of the change in the 10-year Treasury bond yield over the measurement period (February 15 - May 15 annually). When GMP submitted the FY 2021 base rate filing, it also petitioned to apply the nominal revenue sufficiency that would result from the difference between the (0.06%) calculated base rate change and no change to base rates to offset owed quarterly adjustments. On August 27, 2020, the VPUC approved GMP's petition for no change in base rates for FY 2021 and to allow the revenue surplus to be used to offset owed power supply and storm costs.

On June 1, 2020, the Company also filed a petition to modify the MYRP with respect to how GMP returns or collects certain rate adjustors under the plan in order to create as much rate stability as possible for customers. To achieve this goal, GMP proposed to modify how it collects quarterly power supply, retail revenue, and major storm adjustments, seeking a mechanism that results in fewer total changes in customer's bills and extends the collection or return period for any adjustment. On August 27, 2020, the VPUC approved GMP's petition to modify the MYRP adjustor collections.

In January 2020, the Company filed a petition for approval of a Climate Plan, as allowed under the MYRP. The Climate Plan provides a framework for GMP's continuing efforts to prepare for and proactively respond to significant impacts climate change-driven storms are having on GMP's systems and customers. The Climate Plan proposed criteria and a regulatory approval process for selecting and implementing projects. On September 24, 2020, the VPUC approved the Climate Plan limiting Climate Plan spending on climate resiliency projects to \$14,000 annually. In addition, the VPUC directs GMP to include climate resiliency planning in its 2021 Integrated Resource Plan and any future multi-year regulation plans proposed.

(b) Regulatory Assets and Liabilities

FERC FORM NO. 1 (ED. 12-88)	Page 123.12		

Name of Respondent	ne of Respondent This Report is: (1) X An Original				Year/Period of Report
Green Mountain Power Corp	(2) A Resubmission	(Mo, Da, Yr) 03/31/2021	2021/Q1		
NOTES TO FIN	ANCIAL STATEMENTS (Continue	ed)			
Transco investment gain	241	241	3 years		
Tax reform	148,179	84,000	33 years		
Other regulatory liabilities	522	—			
Total regulatory liabilities	200,705	86,001			
Net regulatory liabilities	(24,043)	(35,186)			
Regulatory assets classified as current	28,275				
Regulatory liabilities classified as current	3,463				

The preceding table indicates the amount of net regulatory assets (liabilities) currently recorded. These amounts do not include the recognition of tax effects, which generally would be approximately 27.7%. If the accounting standards for entities subject to rate regulation were not used, the corresponding income and the subsequent amortization of these items would not be recognized.

i. Unfunded and Overfunded Pension Benefits and Postretirement Benefits

The pension and other postretirement benefit regulatory assets reflected above represent the unrecognized pension costs and other postretirement benefit costs that would normally be recorded as a component of other comprehensive loss. Since these amounts represent costs that are expected to be included in future rates, they are recorded as regulatory assets. Also included in the regulatory asset are other employee benefit costs that have been deferred for regulatory purposes. Any overfunded benefit plans will be returned to customers in future rates so they are recorded as regulatory liabilities. See note 14.

ii. Deferred Storm Costs

Under the Company's Regulation Plan, exogenous storm costs in excess of \$1,200 allowed for exogenous factors may be recorded as regulatory assets and recovered in future periods.

GMP has deferred exogenous storm costs incurred during the April 1, 2017 to December 31, 2017 and the January 1, 2018 to December 31, 2018 exogenous storm measurement periods. Per the MYRP, these deferred storm costs will be recovered over 3 years beginning October 1, 2019. In addition, GMP has deferred costs of \$4,696 for major storm costs incurred in fiscal year 2020. The PUC has approved these costs being offset with the amounts due from customers for the PSA/Revenue adjustors and the net under-collection will be offset by additional PSA/Revenue adjustor over-collections.

iii. Community Energy and Efficiency Fund (CEED Fund)

One of the conditions associated with the VPUC approval of the acquisition of the former CVPS was that GMP create the CEED Fund. The CEED Fund was capitalized with an amount equal to \$21,154 (Required Investment) as of the date the VPUC approved the acquisition, June 15, 2012. Interest accrues at the rate of inflation on uninvested amounts until the Required Investment has been made. As of September 30, 2018, GMP has made the required investment which has produced a benefit of \$35,557.

On August 29, 2019, the VPUC issued an order to close the CEED fund.

iv. Pine Street Barge Canal Costs

The Company has recorded a regulatory asset to reflect unrecovered past and future Pine Street Barge Canal costs. After expenses are incurred, the Company will reflect the expenditures in subsequent base rate filings

Name of Respondent	nt This Report is:		Year/Period of Report
	(1) <u>X</u> An Original	(Mo, Da, Yr)	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
	NOTES TO FINANCIAL STATEMENTS (Continued)	

and amortize the full amount of incurred costs over 20 years without a return. The amortization of the past unrecovered costs regulatory asset of \$5,265 is included in rates. The estimated future unrecovered cost regulatory asset of \$2,601 has a matching liability. The amortization of this regulatory asset is expected to be recovered in future rates. See note 18(b).

v. PSA Under-Collection

GMP's regulation plans include revenue and power supply adjustors, which allows GMP to collect from/return to customers the difference between actual retail revenue, power and transmission costs and the amounts reflected in retail rates.

As of September 30, 2020 and 2019, GMP recorded net deferred costs of \$1,169 and \$3,698, respectively. Deferred amounts are recovered from or credited to customers over a period determined at the time of the PSA filing.

vi. Compliance Costs Accelerated

The Company has certain compliance requirements (Tier III) related to reducing Vermont's carbon footprint. Accelerated spending required to achieve and surpass the Tier III compliance requirements has been recorded to a regulatory asset. The regulatory asset will be reduced when used to meet future goals.

vii. Deferred Efficiency Fund

One of the conditions associated with VPUC approval of the 2007 acquisition of GMP by NNEEC (2007 acquisition) was that GMP agreed to create an Efficiency Fund (EF) and an income-based discount program that would be capitalized with an amount of \$8,000, adjusted for inflation since 2001.

viii. Income Taxes

A regulatory asset or liability is established if it is probable that a future increase or decrease in income taxes payable will be recovered from or returned to customers through future rates. Income tax regulatory assets and liabilities have been established for the equity component of the allowance for funds used during construction, federal and state changes in enacted tax rates, if any, and for federal ITCs. These income tax regulatory assets and liabilities are combined into a net income tax regulatory asset.

ix. Digester Development Costs

GMP recorded a regulatory asset for costs related to the preliminary study for the St. Albans digester project. Per the MYRP, these costs will be amortized over the 3 year period beginning October 1, 2019.

x. Derivative Financial Instrument

The derivative financial instrument regulatory asset and liability represents the fair value of certain power supply derivative assets and liabilities that are expected to be recognized in future rates as the derivative contracts are settled. Settlement gains or losses related to the derivative contracts are returned to or fully recovered from customers in the rates GMP charges and are discussed in detail in note 15.

xi. Asset Retirement Obligations

The amount represents the deferred costs expected to be recognized in future rates, associated with conditional asset retirement obligations. Conditional asset retirement obligations are legal obligations to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. The obligation to perform the asset retirement activity is unconditional even though uncertainty exists about the timing and/or method of settlement. Thus, the timing and/or method of settlement may be conditional on a future event. GMP amortizes amounts over periods similar to depreciable

Name of Respondent	This Report is:	Report is: Date of Report Y	
	(1) <u>X</u> An Original	(Mo, Da, Yr)	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
	NOTES TO FINANCIAL STATEMENTS (Continued)	

lives associated with long lived assets included in utility plant.

xii. Microgrid Day One Gain

GMP has recorded a regulatory asset for GMP Microgrid day one gains returned to customers in FY 2019. GMP Microgrid FY 2020 gains were offset against this regulatory asset.

xiii. MYRP Rate Smoothing

In order to smooth the rate increase during the MYRP this regulatory asset was created in FY 2020 and will be reversed in FY 2021 and FY 2022.

xiv. Excess Tax Reform Refunded to Customers

During the period from October 1, 2018 to September 30, 2019 a refund was given to customers due to the tax reform. Over that period, more was refunded than actual tax reform benefits received so this excess will be collected as part of a future rate case.

xv. Tax Reform

Represents the regulatory asset created by the deferral of the utility costs resulting from federal tax reform. This regulatory asset will be netted against the related regulatory liability and the net regulatory liability will be returned to customers through future rates.

xvi. Synergies to be Collected from Customers

GMP has recorded a net regulatory asset for synergies that will be collected from customers. GMP had a regulatory asset of \$1,750 at September 30, 2019 that was included in other deferred charges. As of September 30, 2020, GMP had synergies that will be collected from customers of \$6,530. This will be collected in rates in a future rate filing.

xvii. Electricity Assistance Program

The Vermont Legislature passed a law in 2009 authorizing the VPUC to implement low income rates. GMP implemented an Electricity Assistance Program (EAP) in 2013 that provides financial assistance to qualified low-income residential customers. The program is funded by a per meter charge to all retail customers. The regulatory asset balance represents the excess of program costs over amounts collected from customers to fund the program. The balance will be collected through future changes to the EAP.

xviii. Deferred Tree Trimming Costs

The PUC approved tree trimming costs that the Company could defer. Under the MYRP these costs will be amortized over 3 years through September 30, 2022.

xix. Other Regulatory Assets

Consists of various other projects and deferrals that the Company expects to be recovered in future rates.

xx. Accumulated Non-Legal Costs of Removal

Represent removal costs previously recovered from ratepayers for other-than-legal obligations. The Company reflects these amounts as a regulatory liability. The Company expects, over time, to recover or settle through future revenues any under- or over-collected net costs of removal.

xxi. Millstone Unit #3 ARO

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
	(1) <u>X</u> An Original	(Mo, Da, Yr)	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
	NOTES TO FINANCIAL STATEMENTS (Continued)	

The Company has legal asset retirement obligations for decommissioning related to its jointly owned nuclear plant, Millstone, and has an external trust fund dedicated to funding its share of future costs. This regulatory liability represents the excess of the Decommissioning Trust Fund asset balance over the asset retirement obligation for decommissioning. The liability balance will decrease when the forecasted decommissioning obligation exceeds the trust fund asset, resulting in a regulatory asset or returned to customers when Millstone is fully decommissioned.

xxii. Microgrid Development Fee

GMP has recorded a regulatory liability for fees received from GMP VT Microgrid related to the development of certain microgrid projects. A portion of these fees were returned to customers from October 1, 2018 to September 30, 2019 in accordance with the 2019 base rate filing. The remaining balance is being returned over 3 years beginning October 1, 2019.

xxiii. VYNPC Net Unrealized Gains on Long Term Investments

Net realized gains (losses) on investments in debt securities in the VYNPC Spent Fuel Disposal Trust have the effect of reducing (increasing) billings to VYNPC customers. Accordingly, the Company includes any net unrealized gain or loss (i.e., the difference between their cost and fair values) as an increase to regulatory assets or regulatory liabilities.

xxiv. Transco Investment Gain

Pursuant to an Accounting Order issued by the VPUC, GMP deferred its share of an investment gain recognized by Transco in FY 2019 and FY 2020. GMP deferred \$8,549 and returned \$8,308 to customers through September 30, 2019. The remaining balance is being returned to customers over 3 years beginning October 1, 2019.

xxv. Tax Reform

Represents the regulatory liability created by the deferral of the utility benefits resulting from federal tax reform. The regulatory liability of \$145,500 at September 30, 2020, consists of \$81,320 of protected plant which is being returned to customers over 33 years and \$64,180 associated with GMP's investment in Transco. Return of the Transco tax reform regulatory liability is dependent on Transco receiving FERC approval which has not yet been received.

xxvi. Other Regulatory Liabilities

Consists of various other benefits that the Company will return in future rates.

(a) Vermont Electric Power Company (VELCO) and Vermont Transco LLC (Transco)

VELCO and Transco own and operate the transmission system in Vermont over which bulk power is delivered to all electric utilities in the state. Transco owns the transmission assets comprising the system. Transco was formed by VELCO and VELCO's owners in 2006 and VELCO was appointed as the manager of Transco. On June 30, 2006, VELCO contributed substantially all of its operating assets to Transco, in exchange for 2,400 Class A Membership Units and Transco's assumption of VELCO's debt. Transco is governed by an Amended and Restated Operating Agreement (the Transco Operating Agreement) by and among VELCO, the Company and most of Vermont's other electric utilities. VELCO operates the Transco system under a Management Services Agreement with Transco. Transco is also governed by certain Amended and Restated Three-Party Agreements, assigned to Transco from VELCO, by and among the Company, VELCO and Transco, and VELCO remains subject to an Amended Four-Party Agreement among the Company and VELCO.

Pursuant to the merger agreement and VPUC order related to the acquisition of the former CVPS by NNEEC, CVPS transferred 38% of the total of VELCO Class B voting common stock and 31.7% of the total of VELCO Class C nonvoting common stock to Vermont Low Income Trust for Electricity, Inc. (VLITE), in June 2012. In addition, the transmission contracts, sponsor agreement and composition of the board of directors under which VELCO operates, effectively restrict the Company's ability to exercise control over VELCO.

GMP has performed an evaluation to determine whether Transco should be consolidated in its financial statements. GMP determined that the variable interest entity model is appropriate model for this evaluation. VELCO, as the managing member of Transco, has complete and exclusive discretion to manage and control Transco's business. The nonmanaging members, such as GMP, are not allowed to participate in the management or control of Transco. Based on this, the evaluation determined that GMP does not have a controlling financial interest in Transco, and therefore, it is not Transco's primary beneficiary and is not required to consolidate Transco in its financial statements.

GMP and all other Vermont electric utilities pay their pro rata share of Transco's total costs, including interest on debt and a fixed ROE, less revenues collected by Transco under the ISO-New England Open Access Transmission Tariff and other agreements. Under these agreements, Transco provided transmission services to GMP (reflected as transmission expenses in the consolidated statements of income) amounting to \$26,477 and \$35,709 for the years ended September 30, 2020 and 2019, respectively. The maximum exposure to loss is the carrying value of GMP's investment.

As of September 30, 2020, VELCO has a 3.9% ownership interest in Transco, bringing GMP's direct and

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
	(1) <u>X</u> An Original	(Mo, Da, Yr)	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
	NOTES TO FINANCIAL STATEMENTS (Continued)	

indirect ownership interest in Transco to 77.0%. The remaining ownership interest in Transco is held by other Vermont-based utilities.

GMP made capital investments of \$8,195 and \$17,924 in Transco in FY 2020 and FY 2019, respectively, to support various transmission projects. GMP received a return of capital from Transco of \$201 in FY 2020 and \$1,484 in FY 2019. GMP receives its current rate of return of 9.06% on the investment in Transco, since the Transco investment is accounted for as a regulated business for Vermont rate-setting purposes. Capital contributions to Transco are based on the transmission cost share of the Vermont utilities. GMP and other taxable Transco owners, also receive additional earnings and distributions to compensate for differences in taxability with other nontaxable Transco owners.

Summarized unaudited financial information for Transco follows:

	 2020	 2019
Net income	\$ 91,606	\$ 93,188
GMP's equity in net income	73,451	72,485
Total assets	1,382,684	1,334,827
Liabilities and long-term debt	578,798	 540,858
Net assets	\$ 803,886	\$ 793,969
GMP's equity in net assets	\$ 632,616	\$ 613,535
Amounts due from (to) Transco, net	\$ 1,639	\$ (96)

GMP's common and preferred stock ownership interests in VELCO entitles it to approximately 38.8% of the dividends distributed by VELCO. GMP has recorded its equity in earnings on this basis.

Included in the Company's financial statements are construction service receipts of \$394 and \$349, billed to VELCO for the years ended September 30, 2020 and 2019, respectively.

Summarized unaudited financial information for VELCO (parent company only) is as follows:

	 2020		2019	
Net income	\$ 2,706	\$	2,225	
GMP's equity in net income	1,689		1,039	
Total assets	75,321		68,080	
Liabilities and long-term debt	 50,632		43,074	
Net assets	\$ 24,689	\$	25,006	
GMP's equity in net assets	\$ 9,664	\$	9,821	

(b) Other Investments in Associated Companies

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

GMP's share of income from other associated companies not discussed in detail above totaled \$162 for the years ended September 30, 2020 and 2019, respectively.

(c) Joint Owned Facilities

GMP's joint-ownership interests in electric generating and transmission facilities as of September 30, 2020 and 2019 are as follows:

	2020						
	Ownership interest	Share of capacity (in MW)	-	hare of lity plant	acc	hare of umulated preciation	
Joseph C. McNeil	31.0 %	16.7	\$	30,936	\$	29,253	
Wyman #4	2.9	17.6		6,377		6,377	
Stony Brook #1	8.8	31.0		12,246		11,727	
Metallic Neutral Return	59.4	—		1,563		1,563	
Millstone Unit #3	1.7	21.4		84,685		51,731	

		2019							
	Ownership interest	Share of capacity (in MW)	-	hare of ility plant	acc	hare of umulated preciation			
Joseph C. McNeil	31.0 %	16.7	\$	30,701	\$	28,250			
Wyman #4	2.9	17.6		6,328		6,328			
Stony Brook #1	8.8	31.0		12,314		11,434			
Metallic Neutral Return	59.4	—		1,563		1,563			
Millstone Unit #3	1.7	21.4		84,295		49,677			

Metallic Neutral Return is a neutral conductor for the NEPOOL/Hydro-Quebec Interconnection.

GMP's share of expenses for these facilities is included in operating expenses in the consolidated statements of income under the caption Power supply - Company-owned generation for the listed generation plants (Wyman, Stony Brook, McNeil and Millstone) and under the caption Transmission expenses for the Metallic Neutral Return. Depreciation expense for all facilities is included under Depreciation and amortization expenses. Each participant in these facilities must provide their own financing.

(5) Long Term Investments

(a) Millstone Decommissioning Trust

GMP has Decommissioning Trust Fund investments related to its joint-ownership interest in Millstone. The

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

Decommissioning Trust Fund was established pursuant to various federal and state guidelines. Among other requirements, the fund must be managed by an independent and prudent fund manager. Any gains or losses, realized and unrealized, are expected to be refunded to or collected from ratepayers and are recorded as regulatory assets or liabilities.

Regulatory authorities limit GMP's ability to oversee the day to day management of its Decommissioning Trust Fund investments; therefore, GMP lacks investing ability and decision making authority.

For the years ended September 30, 2020 and 2019, total sale proceeds were \$4,323 and \$2,350, respectively with minimal realized gains and no realized losses. There were also no loss impairments of debt securities in 2020.

The fair values of these investments as of September 30, 2020 and 2019 are summarized below:

	2020		2019)19			
		Cost	Fa	air value		Cost	Fa	air value
Marketable equity securities	\$	4,205	\$	13,809	\$	4,080	\$	11,470
Marketable debt securities:								
Corporate bonds		699		775		578		638
U.S. government issued debt securities								
(agency and treasury)		1,037		1,123		1,114		1,180

Accumulated depreciation and amortization		713,241	675,322
Net plant in service		1,383,915	1,356,951
Construction work in progress		53,920	39,598
Total utility plant, net		\$ 1,437,835	\$ 1,396,549

In June 2019, the Company acquired certain utility poles, anchors and associated hardware located in Vermont for a total purchase price of \$13,440. The Company assessed this asset acquisition in accordance with ASC 805 - *Business Combinations* as amended by ASU No. 2017-01 - *Clarifying the Definition of a Business* and meets the similar asset threshold and was accounted for as an asset acquisition. The purchase price of the poles, anchors and associated hardware is reported in the above Distribution utility plant major class.

Depreciation and amortization expense amounted to \$60,998 and \$58,265 for the years ended September 30, 2020 and 2019, respectively. During the years ended September 30, 2020 and 2019, administrative and general costs of \$7,234 and \$7,471, respectively, were capitalized, and there were no significant retirements. The composite depreciation rate for plant in service was 2.91% and 2.87%, respectively, in fiscal years 2020 and 2019.

FERC FORM NO. 1 (ED. 12-88)

Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
	NOTES TO FINANCIAL STATEMENTS (Continued)	

The amount of construction work in progress (CWIP) included in rate base was \$8,151 and \$6,128 for the years ended September 30, 2020 and 2019, respectively.

(7) Leases

The Company has operating leases of land and other facilities, which generally have renewal clauses of 1 to 20 years exercisable at the Company's discretion. Minimum rental obligations are accounted for on a straight-line basis over the term of the initial lease, plus lease option terms for certain locations when they are reasonably certain to be exercised. Payments due under lease contracts include fixed payments plus, for many of the Company's leases, variable payments such as proportionate share of the buildings' property taxes, insurance and common area maintenance. Some leases contain variable lease payments that are based on operating hours.

The components of lease expense are as follows:

	September 30, 2		
Operating lease cost	\$	732	
Operating lease cost less variable, low value and short-term leases		535	

Supplemental balance sheet information related to leases are as follows:

	Septe	ember 30, 2020
Operating leases		
Operating lease right-of-use asset	\$	10,673
Lease liabilities		
Current portion of operating lease liabilities		348
Noncurrent portion of operating lease liabilities		9,957

(8) Credit Facilities

Effective September 14, 2018, GMP entered into a \$140,000 revolving credit facility, with a \$10,000 accordion feature, with a consortium of banks. This facility replaced a \$110,000 revolving credit facility with a \$15,000 accordion feature. Effective November 21, 2019, GMP amended the \$140,000 revolving credit facility with a \$10,000 accordion feature, to increase the facility to a \$150,000 revolving credit facility with a \$10,000 accordion feature.

The revolver is unsecured, and allows GMP to choose a rate based on a thirty (30) day LIBOR, Overnight LIBOR or the Alternative Base Rate plus the Applicable Rate (as defined in the revolver), with a margin based upon GMP's Standard and Poor's (S&P) unsecured credit rating of A-. GMP has chosen to borrow using an Overnight LIBOR rate in fiscal years 2020 and 2019. At September 30, 2020 and 2019, the Overnight LIBOR rate was 0.83% and 2.75%, respectively. GMP had \$141,906 and \$125,989 in cash borrowings, and \$6,707 and \$6,569 in letters of credit outstanding under this credit facility at September 30, 2020 and 2019, respectively. The revolver balance has been classified as long-term debt at September 30, 2020 and 2019, as the current facility has a maturity date of September 13, 2022, and the previous facility had a maturity date of December 14, 2019, and no annual requirement to pay off the outstanding balance on the credit facility.

Effective April 29, 2020, GMP entered into a \$50,000 supplemental and secondary line of credit with the same consortium of banks. The secondary line is unsecured, and allows GMP to choose a rate based on a thirty (30) day

FERC FORM NO. 1 (ED. 12-88)

	(1) <u>X</u> An Original	(Mo, Da, Yr)						
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1					
NOTES TO FINANCIAL STATEMENTS (Continued)								

LIBOR, Overnight LIBOR or the Alternative Base Rate plus the Applicable Rate (as defined in the secondary line), with a margin based upon GMP's Standard and Poor's (S&P) unsecured credit rating of A-. GMP has chosen to borrow using an Overnight LIBOR rate. At September 30, 2020 the Overnight LIBOR rate was 1.45%. GMP had \$1,000 in cash borrowings and \$0 in letters of credit outstanding under this facility at September 30, 2020. The borrowings are classified as short-term debt as the secondary line has a maturity date of April 28, 2021.

In addition, GMP has a reimbursement agreement with a commercial bank under which the Company can issue up to \$5,000 in letters of credit. GMP issued \$5,000 in letters of credit under this Agreement as of September 30, 2020 and 2019.

GMP was in compliance with all restrictive covenants and limitations as of September 30, 2020 and 2019

(9) Long Term Debt

Substantially all of the property and franchises of GMP are subject to the lien of the indentures under which the First Mortgage Bonds have been issued. The First Mortgage Bonds are callable at GMP's option at any time upon payment of a make-whole premium. GMP's long-term debt consists of the following:

	September 30			r 30
		2020		2019
Total first mortgage bonds outstanding	\$	779,500	\$	749,830
Revolving line of credit		141,906		125,989
Total long-term debt outstanding		921,406		875,819
Less current maturities (due within one year)		31,355		10,330
Total long-term debt outstanding, less current maturities	\$	890,051	\$	865,489
Weighted average interest rate on first mortgage bonds		4.72 %		4.85 %
Interest rate on revolving line of credit		0.83		2.75

The current corporate unsecured credit rating by S&P is A-; and the current senior secured debt credit ratings for GMP's first mortgage bonds by S&P is A. Amortization of capitalized bond issue expenses totaled \$517 and \$549 for the years ended September 30, 2020 and 2019, respectively.

On September 18, 2020, GMP agreed to issue \$60,000 in First Mortgage Bonds under the 31st Supplemental Indenture in two series. The terms related to each series of bonds are anticipated to be customary and in line with past bond issuances. As in past bond issuances, the bonds will include a provision for a "make-whole premium" which would apply if GMP called the bonds prior to maturity. Since there is a make-whole premium, there would be no detriment to investors if the bonds were redeemed prior to maturity. Each series of bonds will have a fixed rate, the bonds to be issued in December 2020, consist of a \$35,000 series with an interest rate of 1.99% which mature in 2031, and a \$25,000 series with an interest rate of 3.05% which mature in 2049.

On October 17, 2019, GMP issued a total of \$40,000 in First Mortgage Bonds under the 30th Supplemental Indenture in two series. The terms related to each series of bonds are customary and in line with past bond issuances. As in past bond issuances, the bonds include a provision for a "make-whole premium" which would apply

Name of Respondent	This Report is:	Date of Report	Year/Period of Report					
	(1) <u>X</u> An Original	(Mo, Da, Yr)						
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1					
NOTES TO FINANCIAL STATEMENTS (Continued)								

if GMP called the bonds prior to maturity. Since there is a make-whole premium, there would be no detriment to investors if the bonds were redeemed prior to maturity. Each series of bonds has a fixed rate, the bonds issued consisted of a \$25,000 series with an interest rate of 3.53% which mature in 2049, and a \$15,000 series with an interest rate of 3.01% which mature in 2034.

On June 13, 2019, GMP issued a total of \$90,000 in First Mortgage Bonds under the 29th Supplemental Indenture in two series. The terms related to each series of bonds are customary and in line with the terms found within GMP's previous bond issuances. As in past bond issuances, the bonds include a provision for a "make-whole premium" which would apply if GMP called the bonds prior to maturity. Since there is a make-whole premium, there would be no detriment to the investor if the bonds were redeemed prior to maturity. Each series of bonds has a fixed interest rate, the bonds issued consisted of a \$50,000 series with an interest rate of 3.79% which mature in June 2034 and a \$40,000 series with an interest rate of 3.95% which mature in June 2039.

On September 19, 2018, GMP closed on a \$25,000 First Mortgage Bond issuance and on December 3, 2018 GMP issued an additional \$20,000, each under the 28th Supplemental Indenture. The terms related to each series of bonds are customary and in line with the terms found within GMP's previous bond issuances. As in past bond issuances, the bonds include a provision for a "make-whole premium" which would apply if GMP called the bonds prior to maturity. Since there is a make-whole premium, there would be no detriment to the investor if the bonds were redeemed prior to maturity. Each series of bonds has a fixed interest rate, the \$25,000 series with an interest rate of 3.84% which mature in September 2030 and the \$20,000 series with an interest rate of 4.20% which mature in December 2048.

GMP's long-term debt indentures and credit facility contain certain financial covenants. The most restrictive financial covenants include maximum debt to capitalization of 65% under its Indentures and 60% debt to capitalization requirements under the terms of our Vermont Economic Development Authority Recovery Zone Bonds. The Company was in compliance with all restrictive covenants and limitations as of September 30, 2020 and 2019.

The table below includes the maturity of long-term debt in the years subsequent to September 30, 2020:

2021	\$ 31,355
2022	150,791
2023	915
2024	17,500
2025	—
Thereafter	720,845
Total	\$ 921,406

The First Mortgage bonds that mature beyond 2025 have maturity dates that range between 2026 and 2050.

(10) Asset Retirement Obligations

The Company continually reviews the regulations, laws, and contractual obligations to which it is a party to identify situations where there are legal obligations to perform asset retirement activities. Through these reviews, the Company has identified certain easements that may obligate the Company to perform asset retirement activities.

FERC FORM NO. 1 (ED. 12-88)

(12) Stockholder's Equity

(a) Appropriated Retained Earnings

GMP had appropriated retained earnings of \$787 at September 30, 2020 and 2019 relating to regulatory requirements arising from ownership of hydroelectric facilities.

(b) Dividend Restrictions

Certain restrictions on the payment of cash dividends on common stock are contained in GMP's indentures relating to long-term debt and in the Amended and Restated Articles of Incorporation. Under the most restrictive of such provisions, \$269,903 and \$233,154 of retained earnings were free of restrictions at September 30, 2020 and 2019, respectively.

Certain restrictions on the payment of cash dividends on common stock exist as a result of conditions of the VPUC's approval of the 2007 acquisition of GMP by NNEEC and the approval of the merger between GMP and the former CVPS. GMP is required to notify the VPUC of any changes that result in a 3% or greater change in capital structure from the structure approved in GMP's last rate proceeding. GMP is also required to provide notice within 10 days after declaring each regular common stock cash dividend and to provide 30-day advance notice before declaring any special cash dividend.

During the years ended September 30, 2020 and 2019, GMP provided notices related to regular common stock cash dividends.

(c) Capital Contributions

In the years ended September 30, 2020 and 2019, GMP received capital contributions of \$0 and \$10,000, respectively, from its parent, NNEEC. The primary purpose of the investment was to fund investments in utility plant and affiliates.

(13) Income Taxes

The provision for income taxes for the years ended September 30, 2020 and 2019 is summarized as follows:

	2020		2019		
Current federal income taxes	\$ -	_ (\$		
Current state income taxes	2	2	24		
Total current income taxes	2	2	24		
Deferred federal income taxes	14,29	8	(4,434)		
Deferred state income taxes	8,15	1	(269)		
ERC FORM NO. 1 (ED. 12-88) Page 123.27					

Name of Respondent	This Report is:	Date of Report	Year/Period of Report					
	(1) <u>X</u> An Original	(Mo, Da, Yr)						
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1					
NOTES TO FINANCIAL STATEMENTS (Continued)								

Total deferred income taxes	22,449	(4,703)
Investment tax credits-net	 (139)	 (139)
Income tax expense (benefit)	\$ 22,332	\$ (4,818)
Effective combined federal and state income tax rate	 21.29 %	 (6.35)%

The significant items that reconcile between income taxes computed by applying the U.S. federal statutory rate of 21% for 2020 and 2019 and the reported income tax expense (benefit), for the reporting period, include the dividends received deduction, amortization of ITCs, energy credits, corporate owned life insurance, AFUDC equity, and state income tax. In 2020 GMP returned "protected" and in 2019 returned "non-protected" and "protected" accumulated deferred income taxes to customers as a result of the Tax Cuts and Jobs Act of 2017.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and liabilities at September 30, 2020 and 2019 are presented below:

	2020	2019
Deferred tax assets:		
Regulatory liability - Tax reform	\$ 40,325	\$ 41,068
Net operating losses and tax credits	66,768	66,541
Asset retirement and cost of removal obligations	12,277	12,199
Deferred compensation and other benefit plans	20,087	26,234
Other liabilities and deferred credits	6,727	5,255
Derivative financial instruments	5,475	7,107
Total deferred tax assets	 151,659	 158,404
Deferred tax liabilities:		
Accelerated tax depreciation on property	214,829	211,703
Regulatory assets - Pension and other postretirement benefits	27,154	26,119
Pine Street Barge Canal	2,180	2,450
Investment in associated companies	140,894	125,546
FERC FORM NO. 1 (ED. 12-88) Page 123.28	 	

Name of Respondent	Date of Report (Mo, Da, Yr)	Year/Period of Report	
Green Mountain Power Corp	(1) <u>X</u> An Original (2) <u>A Resubmission</u>	(100, Da, 11) 03/31/2021	2021/Q1
NOTES TO FIN	ANCIAL STATEMENTS (Continued	(b	
Other deferred charges and other assets		20,673	19,738
Derivative financial instrument regulatory as	5,475	7,107	
Total deferred tax liabilities		411,205	392,663
Net deferred income tax liability		\$ 259,546	\$ 234,259

The change in the net deferred income tax liability arises from the deferred income tax expense included in the consolidated financial statements for the periods presented, primarily affected by accelerated tax depreciation, tax versus book differences in investment in affiliates, changes in regulatory assets and liabilities and net operating losses.

As of September 30, 2020, GMP has recorded \$66,768 of deferred tax assets related to net operating loss (NOL) carryforwards and tax credit carryforwards. Federal NOL's generated prior to tax reform will expire if unused starting in fiscal year 2034. State NOL's will expire if unused starting in fiscal year 2024. Management believes it is more likely than not that GMP will realize its deferred tax assets based upon the expected future reversals of taxable temporary differences and the generation of future taxable income. Based on these sources of future income GMP has not recorded any valuation allowances as of September 30, 2020 and 2019.

GMP records the benefits of ITC's through the amortization, as approved by the VPUC, of the unamortized ITC's, which are initially recorded as a liability. The remaining balance of unamortized ITCs shown separately on the consolidated balance sheets at September 30, 2020 and 2019 was \$7,167 and \$7,306, respectively.

While GMP believes it has adequately provided for all tax positions, amounts asserted by taxing authorities could be greater than GMP's accrued position. Accordingly, additional provisions on federal and state tax related matters could be recorded in the future as revised estimates are made or the underlying matters are settled or otherwise resolved.

There were no unrecognized tax benefits for the years ended September 30, 2020 and 2019.

GMP recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in nonoperating expenses. During the years ended September 30, 2020 and 2019, GMP recognized no interest and penalties.

GMP is subject to income taxes in the United States, but no foreign jurisdictions.

GMP files a consolidated tax return with its parent company, NNEEC. NNEEC pays all federal and most state income taxes on behalf of GMP. GMP has a tax-sharing agreement with NNEEC to pay an amount equal to the tax that would be paid if GMP filed tax returns on a separate return basis. There was \$239 and \$220 in income taxes payable to NNEEC under the tax-sharing agreement at September 30, 2020 and 2019, respectively.

At September 30, 2020, open tax years for federal and state tax returns are 2017 and forward. There were no federal or state income tax audits during the years ended September 30, 2020 and 2019.

From January 2019 to September 2019, GMP returned \$19,763 of "non-protected" accumulated deferred income taxes to customers in the form of bill credits. During the years ended September 30, 2020 and 2019 returned \$1,937 and \$1,428 of "protected" accumulated deferred income taxes to customers through rates in accordance with

Internal Revenue Service normalization requirements, respectively.

(14) Employee Benefit Plans

(a) Defined Benefit Pension Plan and Other Postretirement Benefit Plan

GMP has a qualified noncontributory defined benefit pension plan (the Pension Plan) covering a large portion of its employees. New employees are not eligible to participate in the defined benefit plan. The defined pension benefits are based on the employees' level of compensation and length of service. Under the terms of the Pension Plan, employees are vested after completing five years of service, and can receive a pension benefit when they are at least age 55 with a minimum of 10 years of service or when their combined years of service and age total 80 or 85 for GMP or the former CVPS plans, respectively. Normal retirement age is 65. GMP makes annual contributions to the plans up to the maximum amount that can be deducted for income tax purposes.

GMP also provides certain healthcare and life insurance benefits for retired employees and their dependents. Employees become eligible for these benefits if they reach retirement age while working for GMP. Eligibility and benefit levels vary depending on date of hire and whether or not the retiree was a CVPS employee prior to the merger with GMP. GMP employees hired after December 31, 2007 are not eligible to receive post-retirement health care benefits. GMP accrues the cost of these benefits during the service life of covered employees.

Postretirement healthcare benefits are recovered in rates. GMP amended its postretirement healthcare plan to establish a 401(h) sub account and separate Voluntary Employee Benefit Account (VEBA) trusts for its union and nonunion employees, for purposes of funding the plan benefits. The VEBA and 401(h) plan assets consist primarily of cash equivalent funds, fixed income securities and equity securities.

At September 30, 2020 and 2019, the unfunded pension obligations totaled \$68,731 and \$79,063, respectively. GMP recorded a regulatory asset for the net actuarial loss in the pension plan. At September 30, 2020 and 2019, the other postretirement benefit assets totaled \$5,645 and \$3,676, respectively, and are included in other assets on the consolidated balance sheets. The Company recorded a regulatory liability for the net actuarial gain in the postretirement benefit plan.

Green Mountain Power Corp	(2)	A Resubmission	03/31/2021	2021/Q1					
NOTES TO FINANCIAL STATEMENTS (Continued)									
Expected return on assets	6.85	6.65	6.85	6.65					
Rate of compensation increase	3.25		3.25	_					
Current year health care cost trend	_	6.50	_	7.00					
Ultimate year health care cost trend	_	5.00	_	5.00					
Year of ultimate trend rate	_	2026	_	2023					

The mortality assumption utilized an Pri-2012 mortality table with Scale MP-2019 for the year ended September 30, 2020. The mortality assumption utilized an RP-2018 mortality table with Scale MP-2018 for the year ended September 30, 2019.

For measurement purposes, a 6.5% annual rate of increase in the per capita cost of covered medical benefits were assumed for 2020 and 2019, respectively. This rate of increase was assumed to gradually decline to 5.0% in 2025. The medical trend rate assumption has an effect on the amounts reported. For example, increasing the assumed healthcare cost trend rate by one percentage point for all future years would increase the total of the service and interest cost components of net periodic postretirement cost for the years ended September 30, 2020 and 2019 by \$99 or 5.5% and \$107 or 5.4%, respectively. Decreasing the trend rate by one percentage point for all future years would decrease the total of the service and interest cost for the years ended September 30, 2020 and 2019 by \$78 or 4.3% and \$87 or 4.4%, respectively. Increasing the assumed healthcare cost trend rate by one percentage point for all future years would increase the postretirement benefit obligation for the years ended September 30, 2020 and 2019 by \$78 or 4.3% and \$87 or 4.4%, respectively. Increasing the assumed healthcare cost trend rate by one percentage point for all future years would increase the postretirement benefit obligation for the years ended September 30, 2020 and 2019 by \$2,453 or 5.7% and \$2,534 or 6.0%, respectively. Decreasing the trend rate by one percentage point for all future years would decrease the postretirement benefit obligation for the years ended September 30, 2020 and 2019 by \$2,453 or 5.7% and \$2,534 or 6.0%, respectively. Decreasing the trend rate by one percentage point for all future years would decrease the postretirement benefit obligation for the years ended September 30, 2020 and 2019 by \$2,453 or 5.7% and \$2,534 or 6.0%, respectively. Decreasing the trend rate by one percentage point for all future years would decrease the postretirement benefit obligation for the years ended September 30, 2020 and 2019 by \$2,049 or 4.8% and \$2,103 or 4.9%, respectively.

GMP's defined benefit plan investment policy seeks to achieve sufficient growth to enable the defined benefit plans to meet their future obligations and to maintain certain funded ratios and minimize near-term cost volatility. Current guidelines for the pension plan combined assets specify that 40% be invested in equity securities, 43% be invested in debt securities, and the remainder be invested in alternative and other investments. Investment guidelines for the other postretirement benefit plan combined assets specify that 8% be invested in equity securities, 86% be invested in debt securities and the remainder be invested in alternative and other investments. GMP's plan is to gradually de-risk the portfolio of other postretirement benefit securities, therefore the investment guidelines are more conservative than the actual allocations at September 30, 2020.

For September 30, 2020 and 2019, GMP expects an annual long term return of 6.85% for the pension plan assets and a return of 6.65% for the other postretirement plan assets. In formulating this assumed rate of return, GMP considered historical returns by asset category and expectations for future returns by asset category based, in part, on expected capital market performance over the next 20 years.

Asset categories and weighted average allocation percentages are provided in the following table.

	2(020	2019

(c) Pension and Other Postretirement Benefit Plan Cash Flow

Projected benefits and contributions are as follows:

	Pension plan			Othe	t benefits			
				Benefit				Benefit
	Contribu	utions	p	ayments	Contributions		p	ayments
Years ending September 30:								
2021	\$	—	\$	14,785	\$	200	\$	2,301
2022		—		15,205		—		2,320
2023		—		14,761		—		2,300
2024		—		14,857		—		2,318
2025		—		15,192		—		2,341
2026 through 2030		_		77,159		—		11,407

The expected benefits in the table above are based on the same assumptions used to measure the Company's benefit obligations at September 30, 2020 and includes estimated future employee service. The company made an additional pension contribution payment of \$13,800 in September 2020, and does not expect to make contributions in 2021. Pension and postretirement contributions beyond 2021 have yet to be determined.

(d) Defined Contribution Plan

GMP maintains a 401(k) Savings Plan for substantially all employees. This plan provides for employee contributions up to specified limits. GMP matches employee pretax contributions up to 4%. GMP contributes each year an additional 0.75% of eligible compensation made on a nonmatching basis to GMP employees hired prior to January 1, 2008 and to former CVPS employees hired prior to April 1, 2010. For GMP employees hired on or after January 1, 2008 and former CVPS employees hired on or after April 1, 2010, GMP contributes each year an additional 3.25% of eligible compensation, made on a nonmatching basis. GMP's matching contribution is immediately vested. GMP's matching and nonmatching contributions for the years ended September 30, 2020 and 2019 totaled \$2,623 and \$2,481, respectively.

(e) Supplemental Executive Retirement Plan

Name of Respondent	This Report is:	Date of Report	Year/Period of Report
	(1) <u>X</u> An Original	(Mo, Da, Yr)	
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1
Ν	OTES TO FINANCIAL STATEMENTS (Continued)	

GMP provides a nonqualified retirement plan (SERP) for certain employees. Benefits under the SERP are funded on a cash basis. The amount of expense recognized for this plan for the years ended September 30, 2020 and 2019 was \$475 and \$223, respectively. As of September 30, 2020 and 2019, the SERP benefit obligation, based on a discount rate of 1.65% and 2.53%, was \$3,235 and \$4,918, respectively. As of September 30, 2020, the current and long-term portions were \$999 and \$2,236, respectively. As of September 30, 2019, the current and long-term portions were \$1,852 and \$3,066, respectively. As of September 30, 2020 and 2019, regulatory assets were recorded for the unrecognized benefit costs associated with actuarial losses in the amount of \$559 and \$842, respectively.

GMP has life insurance policies intended to fund nonqualified SERP and deferred compensation benefits for GMP and former CVPS executives under the terms of their employment agreements. As of September 30, 2020 and 2019, the total cash surrender value was \$20,330 and \$22,069, of which \$11,983 and \$11,803, respectively, is included in a Rabbi Trust.

(f) Deferred Compensation

GMP has a deferred compensation plan for current and past officers and past directors. Amounts deferred are at the option of the officer or director, and include annual interest on the amounts deferred. As of September 30, 2020 and 2019, the obligations were \$3,656 and \$3,847, respectively.

(15) Derivative Financial Instruments

GMP purchases the majority of its power supply, and uses long-term power supply contracts to mitigate rate volatility to customers. GMP may also sell power when an excess supply is forecasted. GMP enters into physical power purchase and sale agreements with various counterparties to hedge against fossil fuel price changes. Some of the purchase contracts are derivatives that meet the exception for a normal purchase and sale contract. For these contracts, GMP records contract-specified prices for electricity as an expense in the period used, as opposed to the changes occurring in fair market values. Other derivative contracts do not meet the exception for a normal purchase and sale contract and they are carried at fair value. See note 17.

GMP previously entered into two capacity rate swap contracts to hedge a portion of its forward capacity costs. Since these contracts settle on a net basis, they do not meet the criteria as a normal purchase and sale and they are accounted for at fair value. Only one capacity rate swap contract remains open at September 30, 2020.

No new derivative contracts were entered into during FY 2020 and FY 2019, except for one short-term sale contract that expired April 30, 2019.

Due to a regulatory order from the VPUC that requires GMP to defer recognition of any earnings or other comprehensive income effects relating to future periods from power supply arrangements that qualify as derivatives, GMP records an offsetting regulatory asset or liability for the fair value and any subsequent unrealized gains or losses, of their derivative instruments. There are no realized gains or losses in the consolidated statements of income because all gains and losses on power contracts are included in the PSA as the contracts settle. The current portion of derivative assets and liabilities, if any, are presented separately in the consolidated balance sheets.

The following table shows the calculated fair value of the derivative contracts, reflecting the risk that GMP or the counterparty will not execute upon the arrangement. Actual value upon settlement may differ materially from the fair values shown below:

Fair value as of September 30

Current portion	\$	1,122	\$	6,007	\$	2,607	\$	8,839

Certain GMP's derivative instruments contain reciprocal provisions that require the counter-parties' and GMP's debt to maintain an investment grade credit rating from the major credit rating agencies. The failure to maintain an investment grade rating would obligate the counterparties or the Company to deposit collateral in an amount equal to the fair value adjustment to the notional amount of the contract for derivative instruments in a liability position. No such collateral was required at September 30, 2020.

(16) Fair Value of Financial Instruments

The Company's estimates of fair value of financial assets and financial liabilities are based on the framework and hierarchy established in applicable accounting pronouncements. The framework is based on the inputs used in valuation, gives the highest priority to quoted prices in active markets and requires that observable inputs be used in the valuations when available. The disclosure of fair value estimates in the hierarchy is based on whether the significant inputs into the valuation are observable.

At September 30, 2020 and 2019, the fair value of GMP's first mortgage bonds included in long-term debt was \$971,609 and \$898,007 (carrying amount of \$779,500 and \$749,830), respectively. The fair value of GMP's first mortgage bonds are measured using quoted offered-side prices when quoted market prices are available. If quoted market prices are not available, the fair value is determined based on quoted market prices for similar issues with similar remaining time to maturity and similar credit ratings.

Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1					
NOTES TO FINANCIAL STATEMENTS (Continued)								

The following table sets forth by level the fair value hierarchy of financial assets and liabilities that are accounted for at fair value on a recurring basis. The Company's assessment of the significance of a particular input to the fair value measure requires judgment, and may affect the valuation of the assets and liabilities and their placement within the fair value hierarchy:

(a) Millstone Decommissioning Trust

GMP's primary valuation technique to measure the fair value of its nuclear Decommissioning Trust Investments is the market approach. GMP owns a share of the qualified decommissioning fund and cannot validate a publicly quoted price at the qualified fund level. However, actively traded quoted prices for the underlying securities in the fund have been obtained. Due to these observable inputs, fixed income, equity and cash equivalent securities in the qualified fund are classified as Level 2. Equity securities are held directly in GMP's nonqualified trust and actively traded quoted prices for these securities have been obtained. Due to these observable inputs, these equity securities are classified as Level 1.

(b) Spent Fuel Disposal Trust Fund

Fixed income securities, including U.S. Treasury/agency obligations, municipal obligations, and corporate bonds, are valued at the closing price reported on the active market on which the individual securities are traded. Other securities are valued by utilizing quoted market prices, dealer quotations, alternative pricing sources supported by observable inputs, or by industry standard models that consider various assumptions including yield curves, volatility factors, prepayment speeds, and default rates.

The Company's accounting policy is to recognize transfers between levels of the fair value hierarchy on the date

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
	(1) <u>X</u> An Original	(Mo, Da, Yr)					
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1				
NOTES TO FINANCIAL STATEMENTS (Continued)							

of the event of change in circumstances that caused the transfer.

On June 26, 2020, the Spent Fuel Disposal Trust was used to settle the DOE liability. Therefore, there are no fair value estimates related to this Trust as of September 30, 2020. See note 5 for additional dissolution information.

(c) Fair value hierarchy of derivative financial instruments

At September 30, 2020, there were no recognized gains or losses included in earnings or other comprehensive income attributable to the change in unrealized gains or losses related to derivatives still held at the reporting date. This is due to the Company's regulatory accounting treatment for all power-related derivatives. The following table is a reconciliation of the changes in net fair value of derivative contracts that are classified as Level 3 in the fair value hierarchy:

Balance at beginning of period	\$ (10,356)
Change in fair value relating to unrealized losses	 (3,738)
Balance at September 30, 2020	\$ (14,094)

(17) Long Term Power Purchase and Other Commitments

(a) Electricity Purchase Commitments

Purchased power expense by significant contract supplier was as follows:

	Year ended September 30			ember 30
	2020			2019
Hydro-Québec	\$	57,097	\$	57,579
Independent Power Producers		31,834		33,750
Next Era		71,043		53,520
Macquarie (formerly Cargill)				4,612
Granite Reliable		14,615		14,543
Citigroup		10,789		4,757
Deerfield		6,494		6,099
Shell		9,808		9,424
BP Energy		15,230		30,299

Certain contracts qualify for normal purchases and sales treatment, and are not subject to fair value accounting treatment as they are for the purchase of electricity to fulfill GMP's power supply needs. The expense related to these contracts is recorded and recognized in power supply expense at the time that the contracts are settled and GMP takes delivery of the electricity.

FERC FORM NO. 1 (ED. 12-88)

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
	(1) <u>X</u> An Original	(Mo, Da, Yr)	-				
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1				
NOTES TO FINANCIAL STATEMENTS (Continued)							

GMP enters into power purchase contracts with various counterparties in the normal course of its business. The counterparties are responsible for acquiring and taking title to the power that is purchased.

Significant purchased power contracts in effect as of September 30, 2020, including estimates for GMP's portion of certain minimum costs, are as follows:

	k	Estimated payments contractually due		
Years ending September 30:				
2021	\$	193,783		
2022		189,411		
2023		186,671		
2024		176,575		
2025		171,793		
Thereafter		1,784,981		
Total	\$	2,703,214		

(b) Hydro-Québec (HQ) Contracts

Deliveries under this purchase agreement commenced on November 1, 2012 and end in 2038. GMP determined that the contract qualifies for "normal purchase normal sale" accounting treatment. In 2020, the energy volumes under the contract represent an estimated 24% of GMP's projected annual energy requirement, which is similar to 2019. The new Hydro-Québec Energy Services (U.S.) Inc. (HQUS) contract does not include capacity, which must be purchased from other parties or left open to market prices.

GMP's contracts with HQ call for the delivery of system power and are not related to any particular facilities in the HQ system. Consequently, there are no identifiable debt-service charges associated with any particular HQ facility that can be distinguished from the overall charges paid under the contracts, and there are no generation plant outage risks, although there are outage risks related to the operation of the transmission system.

(c) System Energy Contracts

GMP enters into system energy purchase contracts with various counterparties in the normal course of its business. The system contracts are usually less than five years in duration and call for firm physical delivery of specified hourly quantities that are not associated with any specific generation source and are not subject to outage risk. The counterparties are responsible for acquiring and taking title to the power that is purchased by GMP. GMP presently has in place several system energy purchases for deliveries through 2025, for terms from several months to 5 years.

(d) Other Renewable Power Contracts

Name of Respondent	This Report is:	Date of Report	Year/Period of Report				
	(1) <u>X</u> An Original	(Mo, Da, Yr)					
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1				
NOTES TO FINANCIAL STATEMENTS (Continued)							

GMP has committed to several contracts to purchase output from new renewable power plants, some for periods of up to 35 years, on a plant-contingent basis (the Company receives and pays only for its share of quantities actually generated by the plant). These purchases typically include energy, capacity, and renewable energy certificates and are derived from wind, solar PV, hydroelectric or landfill gas plants. The largest such purchase is a 20-year contract with the Granite Reliable wind project in New Hampshire, which began in April 2012. GMP has also entered into three renewable power contracts that include battery storage systems. These contracts have a twenty-five year term.

(e) Next Era Seabrook Purchase

GMP agreed to purchase long-term energy, capacity and generation attributes from the Seabrook Nuclear Power Plant in New Hampshire owned by Next Era Seabrook LLC. This contract commenced in 2012. All purchases are unit contingent from the Seabrook Nuclear Power Plant beginning at 60 MW, which will decrease to 50 MW over the life of the contract that ends in 2034.

(f) Unit Purchases (Nonrenewable)

Under a long-term contract with Massachusetts Municipal Wholesale Electric Company (MMWEC), GMP is purchasing a percentage of the electrical output of the Stony Brook production plant constructed by MMWEC. The contract obligates GMP to pay certain minimum annual amounts representing GMP's proportionate share of fixed costs, including debt service requirements, whether or not the production plant is operating, for the life of the unit. The cost of power obtained under this long term contract, including payments required when the production plant is not operating, is included in Purchases from others in the consolidated statements of income.

(g) Kingdom Community Wind

In October 2012, GMP completed construction and began daily commercial operation of the Kingdom Community Wind project (KCW) a 63-MW wind facility in Lowell. 8 MW of the project's output is being sold to Vermont Electric Cooperative, Inc. under a long-term contract. The remainder is incorporated into GMP's power supply.

(h) Nuclear Decommissioning Obligations

VYNPC: VYNPC owned and operated a boiling water nuclear-powered generating plant in Vernon, Vermont until 2002, when it sold the Plant and related assets and liabilities to Entergy. On August 27, 2013, Entergy announced it planned to close and decommission the Plant and the Plant was shut down on December 29, 2014. Entergy assumed the obligation to decommission the Plant when it was sold to them; therefore, GMP has no obligation to decommission the Plant.

Financial obligations of VYNPC continued beyond March 21, 2012, including the one-time fee for the disposal of pre-1983 spent nuclear fuel, and retiree pension and benefits, which will be funded by investments in the Spent Fuel Disposal Trust (through June 26, 2020), the Rabbi Trust, pension plan assets, and related investment income, and future payments from the Sponsors under the Power Contracts, which include GMP and several New England electric utilities.

On June 26, 2020, the Spent Fuel Disposal Trust was utilized to settle the pre-1983 spent fuel liability. After settling this liability there were no excess funds in the Trust Fund to be returned to VYNPC's Sponsors.

Millstone Unit #3: GMP is obligated to pay its share of nuclear decommissioning costs for nuclear plants in which it has an ownership interest. GMP has an external trust dedicated to funding its joint-ownership share of future Millstone Unit #3 decommissioning costs. Dominion Nuclear Connecticut has suspended contributions to

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

the Millstone Unit #3 Trust Fund because the minimum NRC funding requirements have been met or exceeded. GMP also suspended contributions to the Trust Fund, but could choose to renew funding at its own discretion if the minimum requirement is met or exceeded. If a need for additional decommissioning funding is necessary, GMP will be obligated to resume contributions to the Trust Fund.

Other Yankee Companies: GMP has equity ownership interests in Maine Yankee, Connecticut Yankee and Yankee Atomic. These plants are permanently shut down and completely decommissioned except for the spent fuel storage at each location. GMP's ownership interest related to these plants are described in note 4. The balance of GMP's net nuclear decommissioning cost liability was \$35 at September 30, 2020. The current and long-term portions of \$11 and \$24 are included in accounts payable, trade and accrued liabilities and other liabilities. The balance of GMP's net nuclear decommissioning cost liability was \$26 at September 30, 2019. The current and long-term portions of \$11 and \$15 are included in accounts payable, trade and accrued liabilities and other liabilities.

(i) Renewable Energy Credits

During the years ended September 30, 2020 and 2019, GMP received \$12,189 and \$18,506, respectively, of net revenue from RECs. GMP's RECs for the year ended September 30, 2020 were approximately 25% from Granite Reliable, 7% from McNeil, 1% from Moretown, 15% from KCW, 20% from owned hydro, 6% from Rygate, 12% from Deerfield and 14% from a variety of other sources. In the future, REC revenues may become less certain as Vermont and other states may adjust their renewable policies.

(j) Avangrid Renewables Agreement

In October 2015, GMP signed a twenty-five year purchase power agreement with Avangrid Renewables to purchase 100% of the output from their 30 MW Deerfield wind facility (Deerfield) that was developed in southern Vermont. This contract is unit-contingent meaning that GMP only pays for the actual output of the plant that it receives, which includes energy, capacity, and renewable energy certificates. Deerfield began construction in September 2016 and began producing electricity in December 2017. GMP has an option to buy Deerfield at the end of 10 years at a predetermined purchase price of \$50,000.

(k) Renewable Energy Standard

GMP is subject to the State of Vermont's policy encouraging the development of renewable energy sources in the State of Vermont as well as the purchase of renewable power by the State's electricity distributors. In December 2011, the Department published its "Comprehensive Energy Plan" setting a goal to have 90.0% of the State of Vermont's energy needs come from renewable sources by the year 2050.

Additionally, in June 2015, the Vermont General Assembly enacted a new renewable energy law establishing a mandatory renewable energy standard for Vermont utilities. This law repeals Vermont's Sustainably Priced Energy Enterprise Development Program (commonly referred to as SPEED) from 2005 and specifically requires that retail electricity providers: (1) have a minimum amount of renewable electricity in their supply portfolios; (2) support relatively small (less than 5 MW) renewable energy projects connected to the Vermont grid; and (3) invest in projects to reduce fossil fuel use for heating and transportation. The resource requirements under the new law began in 2017 based on the calendar year and escalate in quantity each year until 2032. In light of the existing renewable energy sources in its long-term supply portfolio, as well as the availability of renewable energy sources in the region, GMP is well-positioned to comply with the new renewable energy law and anticipates exceeding the calendar year 2020 goals with the purchase and retirement of RECs, the growth of Net Metering, and the continued investments in support of GMP's cold climate heat pump program.

(I) Hydro Dam Power Contracts

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

GMP has executed 25 year purchased power agreements to purchase 100% of the output of 2 hydroelectric power plants. The plants are located in Sheldon Springs, Vermont and LaChute, New York. The Sheldon Springs plant has a nameplate capacity rating of 27MW and the LaChute plant has a nameplate capacity of 9 MW. The agreements require GMP to pay a fixed price per MWh generated plus a fixed monthly capacity payment. The energy and capacity prices escalate by 2% each year. Deliveries under the Sheldon Springs contract began in April 2018. Deliveries under the LaChute contract are pending acceptance of the generation facility to be a wholesale generator by the New York Independent System Operator.

(18) Environmental Matters

(a) General

The electric industry typically uses or generates a range of potentially hazardous products in its operations. GMP must meet various land, water, air, and aesthetic requirements as administered by local, state, and federal regulatory agencies. GMP believes that it is in substantial compliance with these requirements, and that there are no outstanding material complaints about GMP's compliance with present environmental protection regulations.

(b) Pine Street Barge Canal Superfund Site

In 1999, GMP entered into a United States District Court Consent Decree constituting a final settlement with the United States Environmental Protection Agency (EPA), the State of Vermont and numerous other parties of claims relating to a federal Superfund site in Burlington, Vermont, known as the "Pine Street Barge Canal". The consent decree resolves claims by the EPA for past site costs, natural resource damage claims, and claims for past and future remediation costs. The consent decree also provides for the design and implementation of response actions at the site. As of September 30, 2020, GMP has estimated total costs of GMP's future obligations under the consent decree to be approximately \$2,601, net of recoveries. The estimated liability is not discounted, and it is possible that GMP's estimate of future costs could change by a material amount. As of September 30, 2020 and 2019, GMP has recorded a regulatory asset of \$7,866 and \$8,842, respectively, to reflect unrecovered past and future Pine Street Barge Canal costs. Pursuant to GMP's 2003 Rate Plan, as approved by the VPUC, GMP began to amortize and recover these costs in 2005. GMP will amortize the full amount of incurred costs over 20 years without a return. The amortization is expected to be allowed in current and future rates, without disallowance or adjustment, until the regulatory asset is fully amortized.

(c) Air Quality Rules and Laws

The United States Environmental Protection Agency and various states have enacted air quality rules and laws which do not result in material direct costs to GMP because of GMP's limited involvement in power plants impacted by these laws and regulations. Future regional or national emission regulations (or tightening of existing regulations like the Regional Greenhouse Gas Initiative) could indirectly affect GMP by increasing wholesale power market prices; GMP's exposure to such increases is limited because a large fraction of its long-term energy needs will be met with long-term, stable-priced sources.

(19) Other Contingent Liabilities

(a) DOE Litigation - Maine Yankee, Connecticut Yankee and Yankee Atomic

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

All three companies have been seeking recovery of fuel storage related costs stemming from the default of the DOE under the 1983 fuel disposal contracts that were mandated by the United States Congress under the Nuclear Waste Policy Act of 1982. Under the Act, the companies believe the DOE was required to begin removing spent nuclear fuel and greater than Class C waste from the nuclear plants no later than January 31, 1998 in return for payments by each company into the nuclear waste fund. No fuel or greater than Class C waste has been collected by the DOE, and each company's spent fuel is stored at its own site. Maine Yankee, Connecticut Yankee and Yankee Atomic collected the funds from GMP and other wholesale utility customers, under FERC approved wholesale rates, and GMP's share of these payments was collected from their retail customers. The federal courts issued a series of decisions regarding Phase I damages, and in December 2012, the DOE's right to further appeals expired. Accordingly, the judgment awarding Phase I damages to Maine Yankee, Connecticut Yankee and Yankee Atomic became final. In January 2013, the federal government reimbursed the three companies for the Phase I damages. In June 2013, FERC established the process by which the litigation proceeds are credited and approved refunds through lower wholesale rates to utility customers, effective July 2013. GMP's share of the Phase I damages totaled approximately \$3,767. Phase I includes damages for Connecticut Yankee and Yankee Atomic through 2001, and for Maine Yankee through 2002.

Phase II damages were ruled upon in November of 2013, and the DOE did not appeal. GMP's share of these funds, totaling \$5,700, was received in June 2014.

A complaint for Phase III damages was filed in August 2013. A trial was held from June 30 through July 2, 2015. A favorable decision awarding 98.6% of damages requested was issued in March 2016 and the Government has not appealed the decision. GMP received \$1,568 in 2017 which was returned to customers through the PSA.

A complaint for Phase IV damages was filed in May 2017 for damages through 2016. In April 2019, an order awarding partial summary judgment and a substantial portion of the Phase IV damages became final and no longer subject to appeal. On June 11, 2019, the federal government reimbursed Maine Yankee, Connecticut Yankee and Yankee Atomic per that order. On June 12, 2019, the remaining disputed amount was resolved by the court's acceptance of an Offer of Judgment, and the federal government reimbursed the three companies pursuant to the Offer of Judgment on July 17, 2019. On September 23, 2019, per the process established by the FERC in 2013, the three companies made a filing with the FERC which is required prior to disbursing the funds to wholesale customers like GMP. The filing was approved and GMP received \$690 in December 2019 which was returned to customers through the PSA.

Due to the complexity of these issues and the potential for further appeals, the three companies cannot predict the timing of the final determinations or the amount of damages that will actually be received. Each of the companies' respective FERC settlements requires that damage payments, net of taxes and further spent fuel trust funding, if any, be credited to wholesale ratepayers including GMP. GMP expects that its share of these awards, if any, would be credited to retail customers.

(b) Nuclear Insurance

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

The Price Anderson Act provides a framework for immediate, no fault insurance coverage for the public in the event of a nuclear power plant accident that is deemed an extraordinary nuclear occurrence by the NRC. The primary level provides liability insurance coverage of \$450,000, or the maximum private insurance available. If this amount is not sufficient to cover claims arising from an accident, the second level applies offering additional coverage up to \$13,798,000 per incident. For the second level, each operating nuclear plant must pay a retrospective premium equal to its proportionate share of the excess loss, up to a maximum of \$138,000 per reactor per incident, limited to a maximum annual payout of \$20,500 per reactor. These assessments will be adjusted for inflation and the U.S. Congress can modify or increase the insurance liability coverage limits at any time through legislation. Currently, based on the GMP's joint ownership interest in Millstone, GMP could become liable for expenses of approximately \$354 of such maximum assessment per incident per year. Maine Yankee, Connecticut Yankee and Yankee Atomic maintain \$100,000 in Nuclear Liability Insurance, but have received exemptions from participating in the secondary financial protection program.

(c) Other Legal Matters

GMP does not expect any litigation to result in a significant adverse effect on its operating results or financial condition.

(20) Related Party and Associated Company Transactions

GMP purchases natural gas from Vermont Gas Systems (VGS), a subsidiary of NNEEC, in the ordinary course of business. The amounts are insignificant. VGS is also a responsible party in the Pine Street Barge Canal Superfund Site and remits funds related to this matter annually to GMP. Payments totaling \$42 and \$26 were received for the Pine Street Barge Canal Superfund Site during the years ended September 30, 2020 and 2019, respectively, and there were no other transactions between VGS and GMP during the years ended September 30, 2020 and 2019.

NNEEC provides tax and internal audit services for the subsidiaries. For the years ended September 30, 2020 and 2019 the amount provided was \$512 and \$542, respectively.

Total accounts receivable from affiliated companies was \$1,714 and \$8,067 as of September 30, 2020 and 2019, respectively. Included in the September 30, 2019 was a receivable from a Tax Equity Partner. See Note 22. Total accounts payable to affiliated companies was \$1 and \$394 as of September 30, 2020 and 2019, respectively.

(21) Supplemental Cash Flow Information

Supplemental cash flow information for the years ended September 30, 2020 and 2019 are as follows:

	2020	2019
Cash paid for:		
Interest	\$ 40,648	\$ 43,543
Income taxes paid, net	3	2
Supplemental disclosures of noncash information:		
Increase in unfunded pension and other postretirement benefit		
obligations	7,873	41,287
Plant addition for allowance for equity funds used during		
FERC FORM NO. 1 (ED. 12-88) Page 123.47

Cash and cash equivalents			6,801	10,977
Restricted cash included in other assets			7,309	979
Cash, cash equivalents and restricted	cash at end of year	\$	14,110	\$ 11,956

Restricted cash consists of \$6,100 collateral held by HQUS for a Power Purchase and Sales Agreement, \$1,177 cash reserves that GMP VT Solar and GMP VT Microgrid are contractually required to maintain to fund decommissioning and inverter replacements along with \$32 for other miscellaneous cash reserves.

On June 26, 2020, the Company paid \$153,381 to settle the obligation with the DOE. Of this amount, \$152,260 was paid from the Spent Fuel Disposal Trust and the remaining balance of \$711 was settled with cash and cash equivalents. The payment to the DOE is reflected as a use of cash within the operating section of the consolidated statements of cash flows and the proceeds from the Spent Fuel Disposal Trust is reflected as Proceeds from sale/redemption of trust fund securities within the investing section of the consolidated statement of cash flows.

(22) Noncontrolling Interests

The Company follows FASB ASC Subtopic 810-10, "Consolidation – Overall", which requires certain noncontrolling interests to be classified in the consolidated statements of income as part of consolidated net earnings and to include the accumulated amount of noncontrolling interests in the consolidated balance sheets as part of capitalization.

GMP VT Solar:

GMP formed GMP Solar on November 17, 2015 to construct, operate and maintain, through wholly owned limited liability companies (each, a Project Company, together, the Project Companies), 5 solar generating facilities located throughout Vermont. On May 4, 2016, GMP executed an Equity Capital Contribution Agreement with a tax equity partner (the Tax Equity Partner) to fund the cost to construct the 5 facilities. All 5 projects were placed in service by December 31, 2016. GMP has invested \$41,990 and the Tax Equity Partner has invested \$20,264 into GMP Solar.

The terms and conditions of the various agreements executed in connection with this investment are customary terms and conditions for a tax equity investment. GMP is entitled to 1% of GMP Solar's profits, losses, deductions, and credits for the first five years, and 95% of each such item for the remaining term of GMP Solar. The Tax Equity Partner is entitled to 99% of GMP Solar's profits, losses, deductions, and credits for the first five years, and 5% of each such item thereafter. This change in sharing ratios is referred to as a "partnership flip" structure, because the allocations of all partnership items "flip" from 1% to 95% (with the Tax Equity Partner's allocable share flipping from 99% down to 5%).

Name of Respondent	This Report is:	Date of Report	Year/Period of Report		
	(1) <u>X</u> An Original	(Mo, Da, Yr)			
Green Mountain Power Corp	(2) A Resubmission	03/31/2021	2021/Q1		
NOTES TO FINANCIAL STATEMENTS (Continued)					

GMP has the option to purchase at fair market value the Tax Equity Partner's ownership interest in GMP Solar. The option can be exercised during a 6-month period beginning 5 years after the last day any energy property was placed in service.

GMP Solar is taxed as a partnership, and therefore income taxes are the responsibility of GMP Solar's members.

GMP is the managing member of GMP Solar pursuant to GMP Solar's operating agreement. As managing member GMP will conduct, direct and exercise control over all activities of GMP Solar, and shall have full power and authority on behalf of GMP Solar to manage and administer the business and affairs of GMP Solar.

GMP has executed purchase power agreements with the Project Companies. The term of each of the agreements is 25 years, and GMP will pay a fixed price per kWh and receive all power output produced by the facilities.

Certain risks exist with respect to GMP's investment in and management of GMP Solar, including exposure to operating cost risk, revenue risk created by variations in kWh produced by the projects and ITC risk associated with the projects not meeting the ITC eligibility requirements.

GMP determined GMP Solar to be a VIE under ASC 810. GMP concluded it is the primary beneficiary of GMP Solar, therefore, GMP consolidates GMP Solar.

Summarized GMP Solar financial information follows:

	Years ended September 3			ember 30
	2020		2019	
Net income	\$	887	\$	490
Allocation of net income to partners:				
GMP		443		664
Tax equity partner		444		(174)
Total assets		58,081		57,528
Total liabilities		5,059		2,328

GMP VT Microgrid LLC (GMP Microgrid):

GMP formed GMP Microgrid on June 13, 2017 to construct, operate and maintain, through wholly-owned limited liability companies (each, a "Project Company", together, the "Project Companies"), 3 solar generating facilities each paired with battery storage systems located throughout Vermont. On July 25, 2019, GMP executed an Equity Capital Contribution Agreement with a tax equity partner to invest in GMP Microgrid to fund the total cost to construct the 3 facilities. All 3 projects were in service by September 30, 2019. GMP has invested \$35,025 and the Tax Equity Partner has invested \$14,295 into GMP Microgrid.

The terms and conditions of the various agreements executed in connection with this investment are customary for a tax equity investment. Although GMP contributes 71% of the combined capital in exchange for its share of GMP Microgrid, GMP will be entitled to 1% of GMP Microgrid's profits, losses, deductions, and credits for the first six years, and 95% of each such item for the remaining term of GMP Microgrid. The Tax Equity Partner will contribute the remaining 29% of required capital in exchange for its interest in 99% of GMP Microgrid's profits, losses, deductions, and credits for the first five years, and 5% of each such item thereafter. This change in sharing ratios is referred to as a "partnership flip" structure, because the allocations of all partnership items "flip" from 1% to 95%

NOTES TO FINANCIAL STATEMENTS (Continued)					

(with the Tax Equity Partner's allocable share flipping from 99% down to 5%).

GMP has the option to purchase at fair market value the Tax Equity Partner's ownership interest in GMP Microgrid. The option can be exercised during a 6-month period beginning 5 years after the last day any energy property was placed in service.

As of September 30, 2019, GMP and the Tax Equity Partner were obligated to make additional investments in GMP Microgrid and GMP Microgrid recorded receivables of \$4,500 and \$7,678 from GMP and the Tax Equity Partner, respectively.

GMP Microgrid is taxed as a partnership, and therefore income taxes are the responsibility of GMP Microgrid's members.

GMP is the managing member of GMP Microgrid pursuant to GMP Microgrid's operating agreement. As managing member GMP will conduct, direct and exercise control over all activities of GMP Microgrid, and shall have full power and authority on behalf of GMP Microgrid to manage and administer the business and affairs of GMP Microgrid.

In consideration for services provided by GMP to GMP Microgrid and the Project Companies in connection with the development, construction and installation of the solar energy facilities, the Project companies paid GMP a \$5,056 development fee. The fee was paid as certain construction milestones were achieved.

GMP has executed purchase power agreements with the Project Companies. The term of each of the agreements is 25 years, and GMP will pay a fixed price per kWh and receive all power output produced by the facilities and a fixed price per year for all services performed by the battery energy storage systems payable in equal monthly installments.

Certain risks exist with respect to GMP's investment in and management of GMP Microgrid, including exposure to operating cost risk, revenue risk created by variations in kWh produced by the projects and investment ITC risk associated with the projects not meeting the ITC eligibility requirements.

During the VIE assessment process, it was concluded that GMP is the primary beneficiary of GMP Microgrid and therefore GMP will consolidate GMP Microgrid.

The carrying amounts and classification of GMP Microgrid's assets and liabilities included in the consolidated balance sheets are as follows:

	Years ended September 30			ember 30
	:	2020		2019
Net income (loss)	\$	961	\$	(424)
Allocation of net income (loss) to partners:				
GMP		7,038		6,290
Tax equity partner		(6,077)		(6,714)
Total assets		51,789		59,128
Total liabilities		6,170		13,772

NOTES TO FINANCIAL STATEMENTS (Continued)					

GMP considers events or transactions that occur after the balance sheet date, but before the financial statements are issued, to provide additional evidence relative to certain estimates or to identify matters that require additional disclosure. These financial statements were available to be issued on November 19, 2020 and subsequent events have been evaluated through that date.

On October 1, 2020, in order to simplify VYNPC's administration, accounting and reporting, GMP assumed VYNPC's nonqualified excess defined benefit pension and nonqualified deferred compensation plans and the related Rabbi Trust and received cash of \$485. VYNPC will collect the unrecognized net actuarial loss regulatory asset from Sponsors in fiscal year 2021.

	SSION OF ELECTRICITY FOR OTHE cluding transactions referred to as 'whe		-

1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.

2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c).

3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was received from and in column (c) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c)

4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO - Firm Network Service for Others, FNS - Firm Network Transmission Service for Self, LFP - "Long-Term Firm Point to Point Transmission Service, OLF - Other Long-Term Firm Transmission Service, SFP - Short-Term Firm Point to Point Transmission Reservation, NF - non-firm transmission service, OS - Other Transmission Service and AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.

5. In column (e), identify the FERC Rate Schedule or Tariff Number, On separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (d), is provided.

6. Report receipt and delivery locations for all single contract path, "point to point" transmission service. In column (f), report the designation for the substation, or other appropriate identification for where energy was received as specified in the contract. In column (g) report the designation for the substation, or other appropriate identification for where energy was delivered as specified in the contract.

Report in column (h) the number of megawatts of billing demand that is specified in the firm transmission service contract. Demand reported in column (h) must be in megawatts. Footnote any demand not stated on a megawatts basis and explain.
 Report in column (i) and (j) the total megawatthours received and delivered.

9. In column (k) through (n), report the revenue amounts as shown on bills or vouchers. In column (k), provide revenues from demand charges related to the billing demand reported in column (h). In column (I), provide revenues from energy charges related to the amount of energy transferred. In column (m), provide the total revenues from all other charges on bills or vouchers rendered, including out of period adjustments. Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on bills rendered to the entity Listed in column (a). If no monetary settlement was made, enter zero (11011) in column (n). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.

10. The total amounts in columns (i) and (j) must be reported as Transmission Received and Transmission Delivered for annual report purposes only on Page 401, Lines 16 and 17, respectively.

11. Footnote entries and provide explanations following all required data.

	•		

AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

Name of Respondent	This Report Is:	Date of Report	Year/Period of Report					
Green Mountain Power Corp	 (1) X An Original (2) A Resubmission 	(Mo, Da, Yr) 03/31/2021	End of					
MONTHLY PEAKS AND OUTPUT								

(1) (1) Report the monthly peak load and energy output. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non- integrated system. In quarter 1 report January, February, and March only. In quarter 2 report April, May, and June only. In quarter 3 report July, August, and September only.

(2) Report on column (b) by month the system's output in Megawatt hours for each month.

(3) Report on column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.

(4) Report on column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.

(5) Report on columns (e) and (f) the specified information for each monthly peak load reported on column (d).

(6) Report Monthly Peak Hours in military time; 0100 for 1:00 AM, 1200 for 12 AM, and 1830 for 6:30 PM, etc.

NAME OF SYSTEM: Monthly Non-Requirements MONTHLY PEAK Line **Total Monthly Energy** Sales for Resale & No. Month Associated Losses Megawatts (See Instr. 4) Day of Month (MWH) (a) (b) (c) (d) (e) 1 January 418,977 12,384 577 25 2 February 378,653 20,795 581 1 2 3 March 417,376 54,651 530 4 Total 1,215,006 87,830 1,688 5 April 0 6 May 0 7 June 0 8 Total 9 July 0 0 10 August 11 September 0 12 Total

MONTHLY TRANSMISSION SYSTEM PEAK LOAD								

(1) Report the monthly peak load on the respondent's transmission system. If the respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.

(2) Report on Column (b) by month the transmission system's peak load.

(3) Report on Columns (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).

(4) Report on Columns (e) through (j) by month the system' monthly maximum megawatt load by statistical classifications. See General Instruction for the definition of each statistical classification.

MONTHLY ISO/RTO TRANSMISSION SYSTEM PEAK LOAD								

(1) Report the monthly peak load on the respondent's transmission system. If the Respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.

(2) Report on Column (b) by month the transmission system's peak load.

(3) Report on Column (c) and (d) the specified information for each monthly transmission - system peak load reported on Column (b).

(4) Report on Columns (e) through (i) by month the system's transmission usage by classification. Amounts reported as Through and Out Service in Column (g) are to be excluded from those amounts reported in Columns (e) and (f).

(5) Amounts reported in Column (j) for Total Usage is the sum of Columns (h) and (i).
