Q.DPS.GMP.1-85: Please explain why customers should bear the cost of the loss of major load not related to weather and not a part of the Retail Revenue Adjustor.

A.DPS.GMP.1-85:

This has been a feature of the regulation plan to ensure that there is a mechanism to account for and recover as appropriate for unanticipated events, including this one. This feature has not been triggered in any regulation plan. In practice, with the retail revenue adjustor and the exit of Global Foundries from GMP's load, this feature is unlikely to be relied upon.

Q.DPS.GMP.1-86: Please explain how a reduction in expenses due to the loss of load related to the loss of a major customer increases the cost to ratepayers.

A.DPS.GMP.1-86:

Please see response to Q.DPS.GMP.1-85.

Person/s Responsible for Response: Mathieu Lepage, Rob Bingel
Title of Person/s: VP, CFO & Treasurer; Manager, Financial Planning & Analysis

Q.DPS.GMP.1-96: Referring to Exogenous Non-Storm Adjustor, several enumerated events are included to trigger an adjustment, including "Net loss of major customer(s) load not related to weather and not part of the Retail Revenue Adjuster" (PFT of Ms. Doane and Mr. Bingel, page 35, lines 7-8). Please describe what GMP considers to be a major customer load that would trigger this adjustment.

A.DPS.GMP.1-96:

Please see Response to Q.DPS.GMP.1-85.
