

Under GMP's Multi-Year Regulation Plan, the Current Energy/Major Storm Adjustor will be increased by 0.96% from 2.43% to **3.39% effective April 1, 2024**. The Multi-Year Regulation Plan was approved by the Public Utility Commission in Case No. 21-3707-PET and amended in Case No. 23-0141-PET.

This increase is due to a \$10.7 million increase in power supply and storm-related costs that occurred between April 1, 2023, and September 30, 2023. It also includes a one-time \$6.1 million adjustment for earnings sharing that has already been approved by the Public Utility Commission in Case No. 23-4083-TF. The 3.39% line-item will be on your energy statement for 30 months and may be adjusted down or up in the future based on GMP's actual costs for power supply, sales, and major storm restoration.

The Public Utility Commission is reviewing the increase to the Current Energy/Major Storm Adjustor and customers can file comments at <https://epuc.vermont.gov/> (search for Case No. 24-0301-TF) or via email at puc.clerk@vermont.gov.
