

CUSTOMER NOTICE

Effective January 1, 2026, through December 31, 2026, under GMP's Multi-Year Regulation Plan, the Current Energy/Major Storm Adjustor line item will decrease from 5.69% to 5.38%. An additional \$5.888M in power supply and major storm costs incurred between April 1, 2025 and October 1, 2025 will be collected over a 12-month period, resulting in the lower adjustment percentage.

The Multi-Year Regulation Plan was approved by the Public Utility Commission in Case No. 21-3707-PET and amended in Case No. 23-0141-PET. This 5.38% line item may be adjusted down or up in the future based on GMP's actual costs for power supply, sales, and major storm restoration.

The Public Utility Commission is reviewing the change to the Current Energy/Major Storm Adjustor and customers can file comments at <https://epuc.vermont.gov/> (search for Case No. 25-2703-TF) or via email at puc.clerk@vermont.gov.
