

CUSTOMER NOTICE

Effective July 1, 2026, under GMP's Multi-Year Regulation Plan, the Current Energy/Major Storm Adjustor line item will increase 0.54% from 7.61% to 8.15%. This is due to \$12.901M in power supply and regional grid costs incurred between October 1, 2025 and March 31, 2026 and will be collected over a 12-month period, resulting in this change on the one line item.

The Multi-Year Regulation Plan was approved by the Public Utility Commission in Case No. 21-3707-PET and amended in Case No. 23-0141-PET. In accordance with that Plan, this line item may be adjusted down or up in the future, reflecting actual costs or savings for customers for power supply, sales, and major storm restoration.

The Public Utility Commission is reviewing the proposed 0.54% change to the Current Energy/Major Storm Adjustor and customers can file comments at <https://epuc.vermont.gov/> (search for Case No. 26-0868-TF) or via email at puc.clerk@vermont.gov.
