Re: Case No. 26-1591-TF – GMP Tariff Filing to revise the PSRRA for FY26 Q3

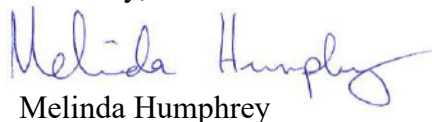

Dear Ms. Anderson:

Green Mountain Power (GMP) writes to provide an updated Line Item Calculation and Record of Filing Tariff, in clean and redline, for this pending quarterly adjustor filing, consistent with the Final Order issued August 28, 2026, in Case No. 26-0096-TF for GMP's FY27 Rate Case. As noted in GMP's initial filing, the quarterly adjustment will result in a decrease for customers, with the precise level of that decrease dependent upon the FY27 base rate adjustment as ordered by the Commission. Using the base rate change of 5.51% to be effective October 1, consistent with GMP's revised Cost of Service submitted today in compliance with the Commission's Final Order, the total quarterly Rate Plan and Storm Adjustments¹ collection will be 7.63%, a decrease of 0.52% from the total quarterly collection line item currently on customer energy statements.

If approved, the quarterly line-item adjustment will be applied to customer energy statements beginning October 1, 2026, for a period of twelve months unless otherwise ordered by the Commission, with the amount subject to modification by later approved quarterly adjustments.

Thank you, and if you have any questions, please reach out.

Sincerely,

Melinda Humphrey

Encls.

cc: Department of Public Service (via ePUC)

¹ As noted on page 35 of the Final Order, we are changing the Current Energy/Major Storm Adjustor line item on statements to "Rate Plan and Storm Adjustments," as of October 1, 2026, and will be updating the bill description and customer-facing explanation on GMP's website.
